# Product Recap

TestMu AI (Formerly LambdaTest)

# TestMu AI (Formerly LambdaTest)

## Recap

TestMu AI (Formerly LambdaTest), facilitates real-time testing across 3,000+ browser and OS combinations. It supports geolocation and parallel testing, CI/CD tool integration, and provides intuitive UI, enhancing compatibility checks and quick onboarding through robust documentation.

Offering extensive browser options and vast device support, TestMu AI enhances testing efficiency with automation and Docker tunnel integration. Its responsive support team aids in accessing legacy browsers and OS, ensuring comprehensive compatibility checks. While users desire improvements in dashboard analytics, native app testing, and performance under heavy loads, there's a high demand for features like real device testing and expanded integrations. As a tool for ensuring cross-browser compatibility and responsive design, TestMu AI is instrumental in testing websites across browsers and operating systems, thus aiding in seamless user experiences. Organizations leverage automation and scalability for quicker test executions, with the platform's integration capabilities crucial for detecting UI issues, improving code quality, and streamlining testing processes.

### What are the standout features of TestMu AI?

- Real-Time Testing: Access to over 3,000+ browser and OS combinations.
- Geolocation Testing: Conduct tests with location-specific configurations.
- Parallel Testing: Run multiple tests simultaneously for efficiency.
- CI/CD Integrations: Compatibility with Jenkins and GitLab for seamless workflow.
- Docker Tunnel Integration: Enhance automation and testing speed.

### What benefits should users look for in reviews?

- Extensive Device Support: Gain access to legacy and modern browsers and OS.
- Responsive Support Team: Quickly resolve issues with expert assistance.
- Robust Documentation: Facilitate rapid platform onboarding.
- Comprehensive Compatibility: Ensure wide-range compatibility checks on various platforms.

In industries focused on digital presence, TestMu AI is vital for companies testing websites on diverse browsers to ensure seamless performance and user satisfaction. It aids in cross-device testing, addressing consumer needs by integrating into CI/CD pipelines for faster, automated detection of UI inconsistencies and code improvements.

# Valuable Features

Excerpts from real customer reviews on PeerSpot:

- ✓ “I was really surprised by LambdaTest; it was a very good service and for the price, I think it is a very good solution.”

**Karine Kirche**

Practice Specialist at a government with 1-10 employees

- ✓ “HyperExecute adds significant speed to execution, enhancing the overall testing process.”

**Kumar Gaurav Jain**

Head of QA at a consultancy with 10,001+ employees

- ✓ “The primary feature that has significantly improved our test execution times is automation.”

**Emilia Apter**

Quality Engineer at Belong

- ✓ “LambdaTest supports multiple platforms like iOS across different devices and enables real-time testing.”

**RamMohan**

Senior Software Engineer at Vvolve management consultants

- ✓ “LambdaTest is easy to use, and the documentation provides all the needed information.”

**Andrew Rorat**

Automation Engineer at a computer software company with 10,001+ employees

- ✓ “Stability-wise, I have not experienced any downtime or other performance issues.”

**Dinesh Saharan**

Presales at Net Solutions

- ✓ “The solution is very easy to understand and has a user-friendly UI.”

**Aniket Bhosale**

Software Test Engineer at Qualitest

## What users had to say about valuable features:

The primary feature that has significantly improved our test execution times is automation. However, there is a lack of devices to connect to. Real device testing depends on what we are testing. If we are testing any native features, like scanning a QR code, it's useful. Otherwise, the majority of the tasks can be done in the simulator.

**Emilia Apter**

Quality Engineer at Belong

“LambdaTest supports multiple platforms like iOS across different devices and enables real-time testing. The capability to connect with a cloud environment and choose the required device model is valuable. It enhances the overall testing experience..”

**RamMohan**

Senior Software Engineer at Vvolve management consultants

[Read full review](#) 

“LambdaTest is highly beneficial, especially for mobile automation testing. Because your company might not have access to various mobile devices or tools, LambdaTest provides a solution for mobile and cross-browser testing in such situations, making it extremely valuable..”

**Yavuz Selim Hüyük**

Software Development Engineer in Test/QA at DAXAP

“The product provides a single platform to manage multiple devices simultaneously. It is easy to learn the product as a beginner. The solution is very easy to understand and has a user-friendly UI. The integration process is good. We can get a real-time view of different devices without any glitches..”

**Aniket Bhosale**

Software Test Engineer at Qualitest

HyperExecute adds significant speed to execution, enhancing the overall testing process. LambdaTest also offers features like cross-browser, cross-device, and cross-platform testing across thousands of mobile devices. Their accessibility and visual regression testing are robust. Additionally, KANEAI, promoted as a flagship product, is being reviewed by me and seems promising.

**Kumar Gaurav Jain**

Head of QA at a consultancy with 10,001+ employees

[Read full review](#) 

“The best features with LambdaTest that I liked most include an easy interface, user-friendly design, and not overly technical functionality for people using it. It is user-friendly, easy to understand, and easy to start testing with this solution. Additionally, each time we saw something that did not seem to work very well, we reached out to the company, and they returned the call very quickly and helped us find a way to solve each problem we encountered.

“I did use the geolocation testing feature..”

**Karine Kirche**

Practice Specialist at a government with 1-10 employees

# Other Solutions Considered

“We chose the platform because it provides access to various browser and OS versions, essential for our testing needs. Additionally, the trial version allowed us to compare it with other tools before deciding..”

**Madan A.**

Senior Quality Assurance Engineer at AppyHigh

[Read full review](#)

“We previously used BrowserStack, which was expensive compared to LambdaTest. Due to budget concerns, we decided to shift from BrowserStack to LambdaTest..”

**RamMohan**

Senior Software Engineer at Vvolve management consultants

[Read full review](#) 

“My experiences with BrowserStack and LambdaTest include conducting very important tests on both products. I was really surprised by LambdaTest. It was a very good service and for the price, I think it is a very good solution. However, we did not test all of the products, as we only tried these two products.

“After a few months, we realized that the phone that we have was sufficient for us..”

**Karine Kirche**

Practice Specialist at a government with 1-10 employees

# ROI

Real user quotes about their ROI:

I purchased LambdaTest to enhance my testing coverage, not for cost savings. While my test coverage has significantly improved, full exploration of its capabilities is still underway.

**Kumar Gaurav Jain**

Head of QA at a consultancy with 10,001+ employees

[Read full review](#) 

# Use Case

I use LambdaTest for cross-browser, cross-platform, and cross-device testing, as well as accessibility testing. I utilize it for my entire suite of testing requirements.

**Kumar Gaurav Jain**

Head of QA at a consultancy with 10,001+ employees

“We are testing a website on the desktop. Our clients need to see how the website looks on different mobile devices. So, we use the solution to test the UI for different mobile devices and see how it looks..”

**Aniket Bhosale**

Software Test Engineer at Qualitest

[Read full review](#) 

---

“We use the product to perform real-time testing of websites and mobile applications. This involves checking different operating systems and browsers for web and mobile functionality..”

**Madan A.**

Senior Quality Assurance Engineer at AppyHigh

[Read full review](#) 

“In our project, we use LambdaTest for browser testing. The team has one shared account. We primarily use LambdaTest for mobile automation, real-time testing, and real device testing across various processes. We also utilize it for mobile testing, reporting, and API testing..”

**Yavuz Selim Hüyük**

Software Development Engineer in Test/QA at DAXAP

[Read full review](#) 

---

“I am a DevOps engineer, and I automate tools for our QA team. We work with LambdaTest to automate test cases using an automation framework. We test US-based cases and integrate LambdaTest with our CICD environment..”

**RamMohan**

Senior Software Engineer at Vvolve management consultants

[Read full review](#) 

“I can provide a review for one of the products that I have experience with. The kind of testing tools we use includes a real phone for testing our application, but we were searching for a cloud solution for testing. However, we ultimately did not choose any of the companies we were trying.

“My experiences with BrowserStack and LambdaTest include conducting very important tests on both products. I was really surprised by LambdaTest. It was a very good service and for the price, I think it is a very good solution. However, we did not test all of the products, as we only tried these two products.

“We tried LambdaTest for testing to determine if the solution could be a good fit for us. The testing was conducted during one month with 20 people for evaluation of the solution.

“Geolocation testing helped verify localized content, as we used this function, but I did not test it very deeply, so I do not have comprehensive information that would be useful.

“After a few months, we realized that the phone that we have was sufficient for us.

“The main differences between the real phone and LambdaTest, in my opinion, are that because we have old iPhones, we can give the employees who need a real phone for testing a device. We were searching for a solution to help them access a different kind of iPhone. If I were the only one to decide if it is a good solution, I would choose LambdaTest. However, because of the many phones that we have, the final decision was to keep our real phone. I think in two or three years, we may need to reconsider this decision..”

**Karine Kirche**

Practice Specialist at a government with 1-10 employees

# Setup

The setup process involves configuring and preparing the product or service for use, which may include tasks such as installation, account creation, initial configuration, and troubleshooting any issues that may arise. Below you can find real user quotes about the setup process.

“The solution's initial setup wasn't difficult because all the instructions were found in the documentation on the website. However, you need to have some minimal experience with the tool to deploy it..”

**Andrew Rorat**

Quality assurance at SHEIZA CONSULTANCY

# Customer Service and Support

The sales and support teams are effective, although aligning client expectations with their roadmaps can occasionally be challenging. They are supportive, listen to needs, and acknowledge when deadlines are missed, working on solutions and making action plans.

**Kumar Gaurav Jain**

Head of QA at a consultancy with 10,001+ employees

[Read full review](#) 

---

“Their customer support is good. Whenever we raise a concern or issue, they support us instantly. They are very well supported during initial setup and adaptation..”

**RamMohan**

Senior Software Engineer at Vvolve management consultants

[Read full review](#) 

---

“There is room for improvement in customer service and support. It's a solution that was implemented years ago, and not a huge community really good. So that's why maybe we can work on technical support..”

**Sheiza Irfan**

Quality assurance at SHEIZA CONSULTANCY

[Read full review](#) 

“ I am not the one who deals with LambdaTest's support team, but the IT team from my company's side connects with the support team of AWS, and most of the time, they get a fair response on time.

I rate the technical support a seven to eight out of ten..”

**Dinesh Saharan**

Presales at Net Solutions

[Read full review](#)

“The best features with LambdaTest that I liked most include an easy interface, user-friendly design, and not overly technical functionality for people using it. It is user-friendly, easy to understand, and easy to start testing with this solution. Additionally, each time we saw something that did not seem to work very well, we reached out to the company, and they returned the call very quickly and helped us find a way to solve each problem we encountered..”

**Karine Kirche**

Practice Specialist at a government with 1-10 employees

[Read full review](#) 

“We had a regression run every two weeks. During every regression testing, we had similar issues from LambdaTest's side, which was a huge problem for our tests, stability, and productivity. I had to call them every two weeks and spend two to four hours on one call to understand why this happened. The LambdaTest engineer we communicated with decided that he didn't need to fix this issue. So, I had to create a workaround from my side. This was the biggest issue I faced with the solution..”

**Andrew Rorat**

Automation Engineer at a computer software company with 10,001+ employees

[Read full review](#) 

# Other Advice

Don't worry about anything. Just go for it. There will not be an issue, as far as you know what you are buying and how you want to use it. Go for it, the platform is good. I rate the solution eight out of ten due to some areas needing improvement. I rate the overall solution eight out of ten.

**Kumar Gaurav Jain**

Head of QA at a consultancy with 10,001+ employees

[Read full review](#) 

---

The recommendation of LambdaTest to others depends on their needs, particularly if they require testing native features that cannot be done on a simulator. App testing that does not require native feature testing can be done on a simulator. I would rate the overall solution seven out of ten.

**Emilia Apter**

Quality Engineer at Belong

[Read full review](#) 

“LambdaTest is well suited to our budget and requirements. It may not be the best tool for everyone, but it suits our needs.

I'd rate the solution eight out of ten..”

**RamMohan**

Senior Software Engineer at Vvolve management consultants

[Read full review](#) 

---

“If you want to control the versions of your computer or mobile device, you can do so quickly with LambdaTest. You don't need to change your browser, app, or phone versions manually. It's a wonderful and beneficial tool that saves me time and makes it easier.

I recommend the solution. Overall, I rate the solution as seven out of ten..”

**Yavuz Selim Hüyük**

Software Development Engineer in Test/QA at DAXAP

[Read full review](#) 

---

“ I would advise them to consider LambdaTest, especially if they need to test across different browsers and OS versions. It's user-friendly and offers valuable features for testing, making it a reliable tool.

I rate it as nine out of ten..”

**Madan A.**

Senior Quality Assurance Engineer at AppyHigh

[Read full review](#) 

“I would assess the benefit of LambdaTest's automated Selenium grid testing as not applicable because we wanted to see what the difference is and what it would bring us to use a cloud solution.

“I would give LambdaTest an eight on a scale of one to ten. I rate it an eight because it offers many kinds of phones and many versions. It is easy to understand the product. Each time I selected a command, the response was really sufficient for us.

“The real phone that we use includes different versions of iPhone and different versions of Android.

“I am not familiar with Apple products such as iPhone 16, [iOS SDK](#), or [ARKit](#) because we just use the common iPhone to ensure our customers receive support. We use the iPhone that we know our customers mainly use.

“My overall rating for LambdaTest is eight out of ten..”

# About PeerSpot

PeerSpot is the leading review site for software running on AWS and other platforms. We created PeerSpot to provide a trusted platform to share information about software, applications, and services. Since 2012, over 22 million people have used PeerSpot to choose the right software for their business.

PeerSpot helps tech professionals by providing:

- A list of products recommended by real users
- In-depth reviews, including pros and cons
- Specific information to help you choose the best vendor for your needs

Use PeerSpot to:

- Read and post reviews of products
- Access over 30,000 buyer's guides and comparison reports
- Request or share information about functionality, quality, and pricing

Join PeerSpot to connect with peers to help you:

- Get immediate answers to questions
- Validate vendor claims
- Exchange tips for getting the best deals with vendor
