Product Recap

Arista Edge Threat Management NG Firewall

Arista Edge Threat Management NG Firewall Recap

Arista Edge Threat Management NG Firewall enhances network security by managing threats, providing VPN connectivity, and monitoring network traffic. It simplifies network management and ensures compliance with policies, offering features like load balancing and network reliability.

Arista Edge Threat Management NG Firewall is known for its robust security, straightforward deployment, and extensive features. It boasts reliable threat detection, flexible policy management, and scalability, catering to different network sizes. Users appreciate the streamlined management console, consistent performance in threat mitigation, and content filtering capabilities. However, customer support response time needs improvement, and software updates sometimes cause issues. The solution has a steep learning curve and requires more intuitive setup processes. Users find the troubleshooting documentation unclear and the reporting features limited, desiring more comprehensive and customizable options.

What are the key features?

- **Robust Security:** Reliable threat detection and content filtering.
- **Easy Deployment:** Straightforward setup process.
- **Flexible Policy Management:** Adaptable to different requirements.
- **Scalability:** Suitable for varying network sizes.
- **Streamlined Management Console:** Simplifies network management.
- **Consistent Performance:** Efficient threat mitigation.

What are the benefits and ROI?

- **Enhanced Cybersecurity:** Blocks malicious activity and ensures compliance.
- **Simplified Network Management:** Eases the complexity of managing networks.
- **Improved Network Reliability:** Ensures dependable performance.
- **Efficient Deployment:** Reduces setup time and effort.
- **Comprehensive Threat Protection:** Monitors and addresses potential threats.

Arista Edge Threat Management NG Firewall is widely adopted in industries requiring stringent network security and efficient management, including finance, healthcare, and education. Organizations use it for load balancing, ensuring network reliability, and maintaining compliance with strict security standards. Its ability to manage policies and scale according to different network sizes makes it a versatile tool for businesses with complex security demands.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

- ✓ “I would say that if you're a small and medium enterprise or an education institution and you have a distributed organization looking for a cost-effective and easy-to-manage next-generation firewall solution with fairly good security, VPN, filtering, and centralized management, then Arista Edge Threat Management NG Firewall is an excellent choice.”

TarunKumar11

Global Leadership Council at a tech company with 10,001+ employees

- ✓ “I see value for money with Arista Edge Threat Management NG Firewall, as it has delivered what I aimed to achieve within a tight budget.”

VIJAY PANDEY

Network Architect at neev limited

- ✓ “My advice to other professionals who are considering implementing Arista Edge Threat Management NG Firewall is that they should not hesitate to do it because it is a more than reliable solution.”

“Arista Edge Threat Management NG Firewall has positively impacted my organization by reducing botnet attacks.”

Verified user

systems engineer at a computer software company with 51-200 employees

“The product's initial setup phase is easy.”

Nitesh Saxena

IT Manager at Avyaan Management

“Phish Blocker is a valuable feature.”

DuncanNdungu

Developer at Savanah

What users had to say about valuable features:

“I did not find the product's features to be the most valuable since I feel that its most beneficial point stems from its cheap price range, which satisfied our company's goals in areas like VPN connectivity, virus protection, and cybersecurity..”

Nitesh Saxena

IT Manager at Avyaan Management

“The best features Arista Edge Threat Management NG Firewall offers are its ability to push a lot of traffic along with bandwidth management and traffic policy.

“Bandwidth management and traffic policy help my organization by keeping our internet subscription low.

“Arista Edge Threat Management NG Firewall has positively impacted my organization by reducing botnet attacks.

“Immediately after I installed the firewall, it stopped a few botnet attacks..”

Verified user

systems engineer at a computer software company with 51-200 employees

[Read full review](#) 

“The biggest advantage for me in Arista Edge Threat Management NG Firewall is that it is simple to deploy, plus it has better use cases compared to other firewalls that provide thousands of features, but 50% are useless.

“The most beneficial capabilities in Arista Edge Threat Management NG Firewall for me include endpoint security, which is far better than the other one, and a next-generation firewall that provides me with a better ability to detect threats such as DDoS attacks and Mitre attacks from external users.

“I am working with the advanced Intrusion Prevention System (IPS) in Arista Edge Threat Management NG Firewall. The IPS helps in my network security. Its role is to detect threats from external sources, such as DDoS attacks and attacks on networks from unknown actors. Arista Edge Threat Management NG Firewall detects threats much better than other vendors because it has a far better hit list and superior security sensors. Additionally, it is cost-effective for any customer. Previously, I used the Palo Alto IPS, but I shifted to Arista Edge IPS due to cost and better app-based, AI-based detection mechanisms that can detect even AI-based threats from external users..”

VIJAY PANDEY

Network Architect at neev limited

“I would first talk about the features then talk about what makes Arista Edge Threat Management NG Firewall very useful. It combines firewall and intrusion prevention system, web filtering, VPN, application control, bandwidth monitoring, and reporting. It's a very modular platform, easy to deploy, simple to manage, has fairly reasonable reporting, provides a strong value to the customers, and also it has good VPN capabilities, and in terms of deployment flexibility, it's very flexible.

“SSL inspection, anti-phishing, DNS filtering, VPN, bandwidth control, and reporting are quite comprehensive.

“Typically, we've seen a drop in the threats because they've been blocked, which contributes to cyber risk reduction. Firewall availability has been more than 99%, ensuring business continuity. We've seen a 30 to 50% reduction in manual firewall administration effort. There's an improvement in visibility across remote users and branch offices, web filtering, faster audit readiness, and it's been a lot from the perspective of mean time to detect and mean time to respond as well. We've seen quicker responses to threats and minimization of business impact.

“Many of our clients have actually benefited from bandwidth optimization, and of course, regulatory compliance in terms of logging and reporting are also the other beneficial use cases..”

TarunKumar11

While I cannot provide a concrete example of how Arista Edge Threat Management NG Firewall has helped protect our infrastructure or manage network traffic within Help IT, I can describe how it has benefited our company's clients by configuring objects, creating rules, and checking the dashboards and statistics that the solution provides.

In terms of the configuration mode, I consider the best features that Arista Edge Threat Management NG Firewall offers to be user-friendly dashboards, statistics, and reports that provide significant value.

“Since Arista Edge Threat Management NG Firewall is quite a user-friendly solution at the configuration level, its features have made my work easier and optimized processes for my clients because the initial startup of the solution is quite agile in terms of configuration deployments, whether objects, rules, and so on. The simple visualization of the information also speeds up a second stage of configuration.

“Arista Edge Threat Management NG Firewall has positively impacted my organization and Help IT's clients by visualizing the actions that this firewall takes against threats that it has blocked or the attempted attacks by attackers against the organization.

“I have observed a specific example of how the tool has helped to identify or block threats, as the alerts that are configured within the solution helped to quickly detect a situation that was successfully contained. .”

Other Solutions Considered

Before implementing Arista Edge Threat Management NG Firewall, I used Fortinet technology and I chose to switch because of the good reviews that this solution has.

Verified user

Supervisor at a consultancy with 11-50 employees

[Read full review](#) 

“We were not using any other solution, and I don't think any of our clients were using any next-generation firewall. It was basic firewall, Check Point firewalls that they were on, as I remember. I think they did not have a next-gen, AI-driven kind of a system, so it did not replace any other tool which is next-generation..”

TarunKumar11

Global Leadership Council at a tech company with 10,001+ employees

[Read full review](#) 

“Compared to the other products in the market, my company chose to work with Arista Edge Threat Management NG Firewall since it is a software-based firewall. My company is currently searching the market for other options against Arista Edge Threat Management NG Firewall. Arista Edge Threat Management NG Firewall is easier to manage than Fortinet..”

Nitesh Saxena

IT Manager at Avyaan Management

[Read full review](#) 

“The main principle difference I see between Arista Edge Threat Management NG Firewall and other products like Palo Alto and Fortinet is that Arista Edge Threat Management NG Firewall serves as a threat prevention device, while the others focus primarily on security. Arista Edge Threat Management NG Firewall simplifies deployment and offers a competitive price, but is somewhat behind in AI threat detection compared to established products. Other vendors provide better customization in reporting..”

VIJAY PANDEY

Network Architect at neev limited

[Read full review](#) 

“Previously, I used the Palo Alto IPS, but I shifted to Arista Edge IPS due to cost and better app-based, AI-based detection mechanisms that can detect even AI-based threats from external users.

“The application control capabilities help manage network traffic. In my use case, I used Palo Alto for app security, and it was similar to what I have with Arista Edge Threat Management NG Firewall..”

VIJAY PANDEY

Network Architect at neev limited

ROI

Real user quotes about their ROI:

I have not observed any tangible return on investment, such as time savings, reduction in necessary staff, or efficiency improvements thanks to Arista Edge Threat Management NG Firewall. In that sense, I do not have any information to provide.

Verified user

Supervisor at a consultancy with 11-50 employees

“From the perspective of ROI, I can mention that it comes from multiple areas such as the reduction in annual security incidents, mean time to detect and mean time to respond, audit preparation time reduction, reduction in internet bandwidth misuse, and also with respect to firewall uptime and availability..”

TarunKumar11

Global Leadership Council at a tech company with 10,001+ employees

Use Case

“I work as a customer with Arista Edge Threat Management NG Firewall. My major use case involves around 70 sites as a branch network, where I connect Arista Edge Threat Management NG Firewall to protect my branch network..”

VIJAY PANDEY

Network Architect at neev limited

[Read full review](#) 

“My main use case for Arista Edge Threat Management NG Firewall is as a perimeter firewall.

“I use it as a perimeter firewall by protecting internet traffic, specifically user to internet traffic..”

Verified user

systems engineer at a computer software company with 51-200 employees

[Read full review](#) 

“I think largely this is used by small and medium enterprises, and mid-market organizations is where I've actually seen them use this platform much more. It's used for secure internet gateway protection, remote office connectivity, and probably also for web content filtering, especially by the schools and enterprises.

“Many of our customers have really benefited, especially in the small and medium businesses, schools and universities, and financial services as well. Typical benefits largely have been reduced malware infections, better visibility into user activity, very simplified firewall administration, reduction in network downtime, and easier compliance reporting..”

TarunKumar11

Global Leadership Council at a tech company with 10,001+ employees

Customer Service and Support

“The support is helpful, though they do have delays. However, their engineers are skilled and provide good support overall. I would subjectively rate their support around 7.5 to 8 out of 10..”

VIJAY PANDEY

Network Architect at neev limited

[Read full review](#) 

“I would rate that as probably an eight out of ten, as I was sharing the fact that it's really good for small and medium enterprises. The response from the engineers is good, they have a strong documentation knowledge base, and the global support is where they lack a bit..”

TarunKumar11

Global Leadership Council at a tech company with 10,001+ employees

[Read full review](#) 

Other Advice

“My advice to others looking into using Arista Edge Threat Management NG Firewall is that it is effective and accomplishes its purpose. I would rate this product a 7 out of 10..”

Verified user

systems engineer at a computer software company with 51-200 employees

[Read full review](#) 

“It is a great tool, but we had to do a lot of research. We must understand it to implement it. We had to do a lot of work for two months to understand the firewall. We took another three weeks to implement the rules. It took us a lot of time. Overall, I rate the tool a seven out of ten..”

DuncanNdungu

Developer at Savannah

[Read full review](#) 

“I would say that if you're a small and medium enterprise or an education institution and you have a distributed organization looking for a cost-effective and easy-to-manage next-generation firewall solution with fairly good security, VPN, filtering, and centralized management, then Arista Edge Threat Management NG Firewall is an excellent choice. This was pretty good; very comprehensive enough. I would rate this review an 8 out of 10..”

TarunKumar11

Global Leadership Council at a tech company with 10,001+ employees

[Read full review](#) 

“The product offers DPI capability. My company does not use the DPI capabilities. I recommend the tool to those who plan to use it. I rate the tool a seven out of ten..”

Nitesh Saxena

IT Manager at Avyaan Management

[Read full review](#) 

I would not like to add anything else about the main use case or any situation. I would not like to add anything else about the tool's features.

“I would not like to add anything else about the necessary improvements or any other aspect I consider relevant.

“My advice to other professionals who are considering implementing Arista Edge Threat Management NG Firewall is that they should not hesitate to do it because it is a more than reliable solution. I repeat that the configuration, visualization dashboard panel, reports, alerts, and metrics are quite powerful. I find it to be a

powerful solution.

“I do not have any additional comments about Arista Edge Threat Management NG Firewall before we finish.

“I provided this review with an overall rating of eight. .”

Verified user

Supervisor at a consultancy with 11-50 employees

[Read full review](#) 

“I work with other products as well, but I also utilize Arista Edge Threat Management NG Firewall products.

“I am working with Arista Edge Threat Management NG Firewall and utilize Dynamic VPN to connect to [Azure](#). I see a benefit from that feature as it helps detect threats and provides dynamic switchover between different branch networks or ISPs. If one VPN goes down, it dynamically fails over to another VPN without disrupting my traffic while maintaining the same security level and threat detection across failover scenarios.

“Arista Edge Threat Management NG Firewall does help to address vulnerabilities exclusively for the Edge product and provides insights into firewalls and threat management.

“I measure how effective the tool is through a single [CloudVision](#) dashboard, which helps detect everything from one interface. I use two types of threat detection dashboards, including the cognitive UI of Arista Edge Threat Management NG Firewall, which is unique and helps detect all logs. I also integrated a [ServiceNow](#) solution for dynamically creating tickets and communication with users, automating processes to get a better view without manually checking the threat management dashboard.

“I would rate Arista Edge Threat Management NG Firewall a 7.5 out of 10, and I would say it is closer to an 8-point rating..”

About PeerSpot

PeerSpot is the leading review site for cloud, AI, and business software. We created PeerSpot to provide a trusted platform to share information about software, applications, and services. Since 2012, over 22 million people have used PeerSpot to choose the right software for their business.

PeerSpot helps tech professionals by providing:

- A list of products recommended by real users
- In-depth reviews, including pros and cons
- Specific information to help you choose the best vendor for your needs

Use PeerSpot to:

- Read and post reviews of products
- Access over 30,000 buyer's guides and comparison reports
- Request or share information about functionality, quality, and pricing

Join PeerSpot to connect with peers to help you:

- Get immediate answers to questions
- Validate vendor claims
- Exchange tips for getting the best deals with vendor
