Product Recap

Comet

Comet Recap

Comet offers powerful capabilities for tracking, comparing, and optimizing machine learning models, making it a valuable tool for data-driven enterprises aiming to improve project outcomes.

Designed with efficiency in mind, Comet enhances experiment tracking and model management. It supports diverse machine learning workflows helping teams streamline model development and iteration. Integration with popular ML libraries provides seamless tracking and enhances model reproducibility. Valuable for projects requiring collaboration and transparency, Comet aids teams in maintaining consistency across ML pipelines.

What are Comet's key features?

- **Experiment Tracking:** Allows detailed tracking of multiple iterations to provide insights and enhance decision-making.
- **Model Versioning:** Facilitates clear tracking of model changes aiding in better management and deployment.
- **Collaboration Tools:** Supports team collaboration by sharing experiments and insights efficiently.
- **Real-Time Visualization:** Offers visualizations for quick analysis helping teams rapidly interpret results.
- **Integration Support:** Provides easy integration with ML libraries enhancing user flexibility.

What benefits are associated with Comet?

- **Increased Efficiency:** Streamlines processes allowing data scientists to focus on core analysis tasks.
- **Collaboration Enhancement:** Supports collaborative environments through shared dashboards and reports.
- **Improved Reproducibility:** Ensures that experiments can be rerun with consistent results, aiding in validation and testing.
- **Scalability:** Adapts to growing data and model needs, supporting extensive ML operations.

In industries like finance, healthcare, and manufacturing, Comet is implemented to enhance model accuracy and efficiency. By providing robust experiment tracking and collaboration capabilities, Comet allows teams to innovate and deliver results within demanding operational frameworks.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

- ✓ “Comet's return on investment is evident through significant time reduction, which is the most crucial factor I have observed.”

Kevin Shah

Senior Data Scientist at Evolvision Technologies

- ✓ “I feel that I save about one hour of work per day thanks to Comet.”

Carlos Sanchez

Manager & Co-Founder at Arido

- ✓ “The best features Comet offers include the agentic capability that I previously explained, where it compares and acts upon my instructions, goes through websites, makes summaries, and drafts emails, which is what I actually appreciate most in Comet browser.”

Verified user

AI/ML Engineer

- ✓ “Comet has positively impacted my organization by definitely reducing my manual work.”

Avi Cherny

Automation Engineer at MyDubai.io

- ✓ “Comet has positively impacted my organization by making work easier and faster.”

Verified user

Cloud Engineering and Automation Engineer at a tech vendor with 51-200 employees

- ✓ “Model metric tracking and comparison has been extremely beneficial, and Comet's customer service has also been excellent—any issue we've had, they have been able to help us resolve.”

Verified user

Data Scientist at a computer software company with 1,001-5,000 employees

What users had to say about valuable features:

“The best features Comet offers include the agentic capability that I previously explained, where it compares and acts upon my instructions, goes through websites, makes summaries, and drafts emails, which is what I actually appreciate most in Comet browser.

Comet has made me faster in going through each article, which may not seem useful until I read the complete article. Using the summarization feature in Comet allows me to read the summary and know whether it is the relevant article that I want to look at.

I estimate that around ten to fifteen percent of my time might be saved using Comet, though the improvement is not substantial..”

Verified user

AI/ML Engineer

[Read full review](#) 

“The best feature of Comet is the assistant; I do not use many other main functions from Comet. I usually keep seventeen to twenty tabs open every day, which I use throughout the day, and I appreciate that Comet does not erase my history or open tabs. They just open up again every day, and I find the assistant great, built into the search engine.

“The feature that keeps tabs open is great because they are updated and still on the same page where I left off, which is super helpful, allowing me to quickly return to what I was working on. Similarly, the assistant lets me ask whatever I want directly in the browser, whether it is about history, materials, stock prices, or currency conversions, picking up conversations where I left off, making it very useful..”

CarlosSanchez6

Manager & Co-Founder at Arido

[Read full review](#) 

“In my opinion, the best features Comet offers include AI assistance, task automation, integrations with other software, and a good browsing experience. Comet provides task automation and Perplexity as an AI tool.

“Out of all those features, I find myself relying on task automation the most because that is my favorite.

“Comet has positively impacted my organization by making work easier and faster. It has transformed the workflow because fewer people are needed for some tasks, and the automation of tasks means that not much human effort is required..”

Verified user

Cloud Engineering and Automation Engineer at a tech vendor with 51-200 employees

[Read full review](#) 

“The Assistance feature is valuable to me because of the way it automates tasks. I give it direction, whether that comes from cloud instructions or if I want to publish new advertising on Facebook or create a new post. I simply provide it with guidance, and it completes the task for me.

In my opinion, the best feature Comet offers is the Assistance feature.

Comet has positively impacted my organization by definitely reducing my manual work.

Comet has reduced a couple of hours of manual work every time I use it. Usually, if I need to post something, I have to go into different groups and post it, or if I need to set different configurations and do not know where they are located, Comet has saved me considerable time..”

Avi Cherny

Automation Engineer at MyDubai.io

[Read full review](#) 

“Comet's best features include its smart response system that acts intelligently on whatever questions are asked and conducts global research on the browser. It serves as a personal assistant for users, focusing on how searches, specific data targets, calendar functionalities, Gmail activities, preferred languages, and relevant searches function within Comet. This setup significantly reduces task efficiency in high latency scenarios, providing dynamic websites, faster responses, quicker solutions, and smoother searches compared to typical browsing methods. It serves as an AI assistant or personal assistant for the browser, understanding context on web pages and delivering correct solutions, summaries, and explanations. Additionally, I can effectively engage in shopping by identifying booking options, comparing multiple platforms for cheaper prices, and obtaining ticket bookings and train bookings, all through the browser instead of searching through numerous platforms.

Comet's smart researching and the ability to find cheaper prices in shopping and ticket booking are the features I personally find most useful in my day-to-day work, making my tasks easier and more efficient. Comet excels in web browser functionalities, particularly as an AI web browser.

As an AI tech lead, I have experienced positive impacts from Comet in my organization by facilitating many client researches related to LLM, AI, and agentic automations. Comet behaves effectively in researching different platforms such as LinkedIn, Kaggle, Indeed, Naukri.com, and even other tools such as Malt for identifying potential clients suitable for our projects and tasks..”

Kevin Shah

Senior Data Scientist at Evolvision Technologies

Other Solutions Considered

“Before Comet, I used Google Chrome, then switched to the Brave browser. However, I remained happy with Brave, but its search engine and AI capabilities do not compare to Comet, particularly lacking an assistant as handy as Comet..”

CarlosSanchez6

Manager & Co-Founder at Arido

[Read full review](#) 

“Before choosing Comet, I evaluated other options, specifically Chrome with cloud. I actually started with Comet before the cloud option came available, but I still remain using Comet..”

Avi Cherny

Automation Engineer at MyDubai.io

[Read full review](#) 

“I previously used ordinary Chrome, which has no automation capability. I also used Chrome with cloud, and it usually does not work well since it requires me to approve something all the time. I was constantly clicking approve instead of working as Comet does..”

Avi Cherny

Automation Engineer at MyDubai.io

[Read full review](#) 

ROI

Real user quotes about their ROI:

“The time I saved is around ten to fifteen percent compared to what I have done in traditional browsers. While that is not a significant improvement, it has helped me with summarizing and drafting emails..”

Verified user

AI/ML Engineer

[Read full review](#) 

Use Case

“I use Comet for experiment and asset tracking during model development, as well as to support model reproducibility and transparency. I also appreciate the ability to perform an on-prem installation without the need to maintain the installation..”

Verified user

Data Scientist at a computer software company with 1,001-5,000 employees

[Read full review](#) 

“I use Comet for summarizing articles and videos and getting PDFs instantly to draft emails and plan trips. I extract insights, which is the primary function I use Comet for most of the time.

My end use involves automation plus agent behavior, so it can interact with websites for me, execute multi-step workflows, search, and compare between them, then act upon my instructions. This is what I appreciate the most about it..”

Verified user

AI/ML Engineer

[Read full review](#) 

“My main use case for Comet is coding and browser security, and I use it for that most often. I use Comet for coding and browser security as a co-pilot tool, task automation, and enhancing my browsing experience as an AI tool.

“Regarding my main use case for Comet, I notice that it connects with Gmail and calendar, and allows me to send emails and schedule appointments. I appreciate that it operates on a platform familiar to Chrome, which makes it easy to use..”

Verified user

[Read full review](#) 

Cloud Engineering and Automation Engineer at a tech vendor with 51-200 employees

“My main use case for Comet is the Assistance option while I am browsing. The most powerful aspect, and the reason I am switching from Chrome to Comet, is when I need to do automation and navigating. If there are tasks that I do not want to do manually, I use Assistance to complete them for me.

I am using Comet in my workflow as I work with cloud services, and cloud usually requires me to do tasks manually, such as going to specific locations, performing actions, and providing API keys. I copy-paste all these actions and input them into Comet using the Assist option, and Comet completes them for me..”

Avi Cherny

[Read full review](#) 

Automation Engineer at MyDubai.io

“I use Comet for everything, and while I also use another browser focused on privacy, I prefer Comet because it has an assistant that is very interesting. When I open a new tab, instead of typing Google and searching for something, I type directly in AI format, and the AI answers in a better way than Google because Google just gives you information, while the AI selects the best answer from a group of AIs, making it more personalized. The assistant is very handy, as I just click on it and it opens on the side while I refer to whatever I am doing, whether it is the image I am looking at or the information I am reading, and I ask Comet to help me with what I am doing on the website specifically.

“There are many instances where this has been helpful. One time I wanted to understand PhD programs in the United States related to aerospace engineering in a full online program, so I asked Comet about it, kept asking questions, and it gave me a table, examples, websites, and links, allowing me to solve that problem quickly. Another time I needed to see the rate of dollars compared to Mexican pesos, and I just typed it quickly, and Comet provided me with the answer instantly, saving me about three to five seconds, which adds up during the day and therefore saves me a lot of time. I ask whatever question I want, and whatever I can ask ChatGPT, I can ask Comet, but faster, without extra clicks to log into ChatGPT, making it very efficient. I mainly use Comet for general tasks and questions, and it saves me more time than using regular Google..”

CarlosSanchez6

Manager & Co-Founder at Arido

[Read full review](#) 

“My main use case for Comet is to work with agentic behavior, demonstrating how my web browser can be integrated seamlessly. I utilize it to build my browser within the chat, allowing me to ask questions related to web pages or PDFs, summarize web documents, and provide explanations. Additionally, I am building task automation capabilities, such as opening websites with click buttons or filling forms to automate my work. I have utilized it on many shopping platforms for booking tickets, sending cold emails and hot emails to different clients, and conducting research work related to my projects focused on trending technologies in AI to summarize blogs using Comet browser. My productivity has increased, my familiarity with multiple technologies has improved, and I can work faster to integrate different tools like email, calendar, and multiple browser tabs, resulting in a smoother context for memorization.

One specific example where I used Comet for task automation involved generating an automated dataset research within feature extraction of kidney patient data from around the globe for my particular use case. I needed to identify how kidney patients' data on different parameters like creatinine, glucose, and diabetes correlates. If I had done that manually, it would have taken around three to four hours or even a whole day to research different products, gather the data, scrape the particular filters, and conduct multisourcing. By utilizing Comet, it auto-reads all the inputs I am looking for, understands what kind of data inputs I am seeking, and automates the entire web research process more efficiently to provide navigation or a downloadable option for the complete dataset. This is how I implemented automated research on the dataset, leading to the creation of a generation pipeline that helps identify any document of data to download and utilize in my AI work.

At this point, I have nothing else to add about my main use case with Comet, but I can mention several unique features I have experienced with the web browser itself, where I have worked on searching, reading, summarizing, and fixing bugs directly in the browser. Automation processes are continuous, allowing for better results..”

Kevin Shah

Senior Data Scientist at Evolvision Technologies

[Read full review](#) 

Customer Service and Support

“Comet's customer support is good enough; I can reach out to them for any inquiries about policies and security, and they respond quickly with appropriate solutions. Comet's help center contributes significantly to building the AI-powered solution smoothly and rapidly..”

Kevin Shah

Senior Data Scientist at Evolvision Technologies

[Read full review](#) 

Other Advice

“My advice to others looking into using Comet is that you can use it because it is very good. You can use it for task automation, integrations, and other features. I would rate this product an 8 out of 10..”

Verified user

Cloud Engineering and Automation Engineer at a tech vendor with 51-200 employees

[Read full review](#) 

“I advise others looking into using Comet to opt for the AI-assisted browser mechanism instead of conventional browsers, allowing them to customize solutions for research, product delivery, shopping, ticket booking, scheduling emails, and more. Automation made possible through Comet is very effective, and I recommend it highly for those considering switching to an AI-based browser. I am providing this review with a rating of 9..”

Kevin Shah

Senior Data Scientist at Evolvision Technologies

[Read full review](#) 

“My advice to others looking into using Comet is that they try to use it as an ordinary browser and completely miss the Assistance behavior, which is actually a game changer.

I would also like Comet to be connected to GPT or Cloud so I could use it without being dependent specifically on Perplexity.

I would rate this product a nine out of ten..”

Avi Cherny

Automation Engineer at MyDubai.io

[Read full review](#) 

“I choose a rating of six out of ten for Comet because it is not fully developed. I recognize it might be the first release and the first version of what they are building, so I expect more improvements in the future.

I recommend Comet to those who are learning, conducting research, or are college students and university graduates who want to read through lengthy articles. My overall rating for this product is six out of ten..”

Verified user

AI/ML Engineer

[Read full review](#) 

“I have not found the voice mode useful so far, and I have not used the summarizing feature because I am usually busy with other tasks. That said, I think everything is fine and Comet needs to keep improving to benefit everyone. I wish Comet could evolve into a more personalized agent where you either pay little or

nothing to be more productive, especially considering the competitive AI landscape.

“Generally, my projects do not depend on the internet; they rely on my personal skills using specific software on my computer, so I cannot quantify metrics such as projects completed quicker due to using Comet. However, when I do use the internet, I get information faster with Comet, which may not translate into specific monetary gains, but the time saved is significant, as time is money.

“I recommend giving Comet a try, using it to fill tabs and asking questions. Utilize the assistant smartly to save time by having answers provided by a group of AIs rather than solely relying on Google. Try to integrate your work with Comet to improve efficiency and your company's bottom line. I rated this product an eight out of ten..”

About PeerSpot

PeerSpot is the leading review site for cloud, AI, and business software. We created PeerSpot to provide a trusted platform to share information about software, applications, and services. Since 2012, over 22 million people have used PeerSpot to choose the right software for their business.

PeerSpot helps tech professionals by providing:

- A list of products recommended by real users
- In-depth reviews, including pros and cons
- Specific information to help you choose the best vendor for your needs

Use PeerSpot to:

- Read and post reviews of products
- Access over 30,000 buyer's guides and comparison reports
- Request or share information about functionality, quality, and pricing

Join PeerSpot to connect with peers to help you:

- Get immediate answers to questions
- Validate vendor claims
- Exchange tips for getting the best deals with vendor
