Product Recap

Windows 10

Windows 10 Recap

Windows 10 is one of Microsoft's most advanced operating systems for personal computers (PCs), tablets, and other similar devices. To date this operating system is active on more than 1.3 billion personal computers worldwide.

Windows 10 has many features that make it arguably the most popular operating system for PCs on the planet. Included in these are a wealth of security features designed to stop malware from compromising both devices and networks. It has integrations for various multifactor authentication as well as non-password-reliant login technologies such as iris scanning. These keep networks safe from the moment that a user logs in. It also has security tools which not only identify, isolate, and remove threats, but also limit the damage that they can cause.

Benefits of Windows 10

Some of the benefits of using Windows 10 include:

- A wide array of security features that proactively protect your system from malware of all kinds. The Windows Defender Exploit Guard feature constantly scans your system's background for threats. It identifies, isolates, and removes the malware from your infected network. It can also quarantine infected devices to stave off an outbreak of infection across your network.
- Allows you to browse the web in a way that protects your network from cyber-threats, enabling you to browse the internet from the confines of a virtual machine. If your device becomes infected, the malware will be unable to spread beyond the virtual machine that it has already infected.
- The ability to synchronize multiple devices so that you can work from anywhere at any time. Windows 10's Timeline feature enables you to save your work in a Microsoft application. You can then access this saved work on another Windows 10 device and continue from wherever you left off.

Reviews from Real Users

The Windows 10 operating system stands out from the competition for a number of reasons. Two major ones are its ability to secure users from digital threats and its main app management screen, which gives users the ability to easily manage their applications.

One PeerSpot user who is the founder, president, and COO at an analyst firm, noted Windows 10's impressive security suite when they wrote, "My impression is that the [security](#) via Windows Defender is good enough that I no longer feel a need for another third-party security solution, which had always been the case in the past. I think that perception still holds true."

Mike K., a collaboration specialist at a comms service provider, takes note of the main app management screen when he writes, “I like the [main window pane](#) where you can sort your mostly used and different types of apps, such as OneDrive, Google Chrome, and Access. I can just open up the main window, and those apps are right there at my fingertips.”

Valuable Features

Excerpts from real customer reviews on PeerSpot:

“My overall rating for Windows 10 is 9 out of 10.”

Rohan Dixit

Senior Engagement Manager at a tech vendor with 10,001+ employees

“Windows 10 has an inbuilt antivirus system that is quite good compared to Windows 7 or Windows 8.”

AsgharAli

DevOps Engineer at CipherTV Corp.

“Windows 10 is very smooth, and I experience no significant issues.”

HardikShah3

Senior Manager at Morgan Stanley

“I understand that Windows 11 supports quite a bit of additional features for people who are, for example, into high-end gaming and the features that support that kind of utility.”

Deboprio Dutta

Software Engineer at NRI (Nomura Research Institute)

“I am satisfied with Windows 10 security.”

Pifu Lin

Senior System Engineer at DYNASAFE TECHNOLOGIES PTE. LTD.

“It is really easy to configure and maintain.”

Awais Sajid

Security Engineer at Secure Networks

“I like the solution's control panel, system settings, and backup.”

Darko Borovic

Bussines System Administrator at Euronews

What users had to say about valuable features:

Windows 10 is user-friendly and intuitive. The community is larger than that of Linux, which makes finding help easier. In terms of UI and UX, I would readily rate it 10 out of 10. It is beneficial due to its cost-effectiveness compared to other competitors like Mac and Linux.

Ahad Ahmed

BI developer at Jubilee Life Insurance Company Ltd

[Read full review](#)

“We have embedded our tool in Windows 10, so we do R&D through that for security integration with BitLocker.

“There is no difficulty in integrating our tool with Windows 10..”

Ankur Jha

Business Risk Consultant at EY

[Read full review](#) 

Clients prefer LeanIX capabilities, especially around diagramming, because they are super easy. LeanIX is still preferred, but Ardoq is gaining traction. I find Copilot to be a very good and wonderful product. I use Copilot to capture meeting notes and get summaries and bullet points, and it is a wonderful tool.

Rohan Dixit

Senior Engagement Manager at a tech vendor with 10,001+ employees

[Read full review](#) 

“The user interface is something I'm used to and familiar with.

“Regarding features, I am not sure what the most helpful or useful aspects of Windows 10 are, or what makes it particularly special..”

Divya Ramesh

Data Analyst at Uber

[Read full review](#) 

“From Windows 98 to Windows 10, there were various issues, however, Windows 10 has significantly improved. It processes information more quickly, and when using mapping software such as QGIS or ArcGIS, the system remains stable, especially when handling heavy files..”

Verified user

Co-Founder at a consultancy with 51-200 employees

[Read full review](#) 

“We are using Aras PLM, Windows 10 and Jira.

Teams has very good features.

It is more comfortable and it is widely used everywhere in India. Almost 80–90% of people are using Windows 10.

Microsoft Firewall is activated, but no other edge tools..”

SATYAJEET VIKRAM KALE

BI Analyst at SGS systems Pvt Ltd

[Read full review](#) 

Other Solutions Considered

“I also work with Windows 11. The hardware and operating system is easier in Windows 10. It is more fluid and easier to work with Windows 10 than on Windows 11..”

Darko Borovic

Bussines System Administrator at Euronews

[Read full review](#) 

“I upgraded from Windows 10 to Windows 11. I have to face my customers, who normally prefer Windows 11 now, so I upgraded my PC. Windows 11 is more stable overall than Windows 10, and its UI is fantastic..”

Yong Seok Kang

Technical Consultant at MTRiver Consulting

[Read full review](#) 

“Pricing is an issue, as we have been looking for an AWS service that is cheaper. I have been looking at some other tools, and that will happen in the next month since we have our licenses for this month..”

Ankur Jha

Business Risk Consultant at EY

[Read full review](#) 

“I have researched Oracle Agile PLM and Aras Innovator on my website, but feedback is not yet available for these solutions. I was wondering about other tools, particularly in the area of testing or test management..”

SATYAJEET VIKRAM KALE

BI Analyst at SGS systems Pvt Ltd

[Read full review](#) 

“I have experience with Windows 10, Red Hat Enterprise Linux, and SUSE Linux Enterprise. My company, a customer of Windows Server, is now migrating to Linux..”

AsgharAli

DevOps Engineer at CipherTV Corp.

[Read full review](#) 

“Windows 10 is easy to use, but as compared to the other operating system, it is not free. Linux is open source, and Linux is completely free.

The main difference between Windows 7, 10, and 11 is that Windows 11 has CMD installed. So you can easily access things from the command line as well. You can install many things from the command line as well. And now the GUI is relatively easier as compared to Windows 10.

Secondly, the regular updates which Windows 10 and 11 give you. So now I don't know that Windows 10 is being supported by Microsoft because now I'm using Windows 11. But the main thing is that your updates are getting installed easily and automatically. So there is no worry about your operating system being hacked by anyone. They are automatically patching all the vulnerabilities in the system..”

Awais Sajid

Security Engineer at Secure Networks

[Read full review](#) 

ROI

Real user quotes about their ROI:

“Windows 10 is definitely better than Windows 7 in terms of performance, as it is comparatively faster and easier to work with, so all the work gets done quickly..”

Abhilash Sherkane

Practitioner - Service Management at Peristent Systems

[Read full review](#) 

“We haven't calculated it, but I would estimate that the lack of crashes saved us at least 20 hours per year per PC. Maybe, that is a bit high, but it's a ballpark guess..”

Michael Barg

Principal Consultant at Lexington Consulting

[Read full review](#) 

“The tool is used for some basic requirements, so I don't know how we can say that Windows 10 has helped to save money. It is the basic requirement that any tool offers to its users. If we use some extra firewall or antivirus tools, then we can give the rating, but currently, Windows 10 is used for basic needs..”

Nitesh Saxena

IT Manager at Avyaan Management

[Read full review](#) 

“As I mentioned above, Microsoft doesn’t give resellers the opportunity to gain real money with the product itself. Microsoft wants the partners to build themselves some solutions around their ecosystem. But Microsoft did not understand, that most resellers are not inevitably software programmers or designers. Most of the resellers are solution providers in a maybe "older" category of service..”

Fatih Altunbas

IT Solutions Architect at nds Netzwerksysteme GmbH

[Read full review](#) 

Use Case

“I work in a BPO call center, where we only use third-party client tools to make calls. The operating system is just the best. We have nothing much more to do with the operating system, as all the work is done in the tool only..”

Nitesh Saxena

IT Manager at Avyaan Management

[Read full review](#) 

I use Windows 10 as our primary operating system on our workstations. I perform my day-to-day activities using Microsoft Notes, PowerPoint, and Word, which are all part of Windows 10 environment.

HardikShah3

Senior Manager at Morgan Stanley

[Read full review](#) 

“It's generally used for managing the laptop. Its UI is very easily accessible, so I can manage all the things easily across many platforms.

Secondly, Microsoft provides support for a lot of things. So it's generally easy for you to access anything on Windows as compared to Linux..”

Awais Sajid

Security Engineer at Secure Networks

[Read full review](#) 

“In my case, I would mostly say it's because of security reasons. At least for the typical use cases that I generally rely on Windows for, there didn't seem to be a noticeable performance difference for me. There's, of course, the overall more polished and streamlined UI, that sort of thing. However, that's more of a minor consideration for me. Mostly, it's about staying up to date with security patches, etcetera..”

Deboprio Dutta

Software Engineer at NRI (Nomura Research Institute)

[Read full review](#) 

“I use the voice activation feature often for my job, but every day it involves a feature such as Office or Outlook.

“I primarily use the Windows system.

“Windows Server is the most common use case for me..”

Pifu Lin

Senior System Engineer at DYNASAFE TECHNOLOGIES PTE. LTD.

[Read full review](#) 

I am mostly working with Windows 10. I am not working with Linux operating systems such as Ubuntu or Oracle; I primarily use Windows 10 operating systems. I work with Windows 10 only, but I also work with many other Microsoft solutions as well. I have been working with Windows 10 for almost 4-5 years, as I've been on Windows as long as my organization updates the operating systems. I use Windows 10 for my day-to-day office work. I will be honest; Windows 10 as an operating system is something I'm used to, and I've never worked on any other operating system apart from Windows 10, except Linux for a very small period of time. I recommend Windows 10 for all company sizes because it is used across the board, and I don't foresee it being a challenge. Windows 10 is the market leader, while Linux finds its use cases in very specialized roles.

Rohan Dixit

Senior Engagement Manager at a tech vendor with 10,001+ employees

Setup

The setup process involves configuring and preparing the product or service for use, which may include tasks such as installation, account creation, initial configuration, and troubleshooting any issues that may arise. Below you can find real user quotes about the setup process.

“Setup is very easy for me – I'd rate it a ten out of ten. Even for people who don't know much, it's quite easy. It takes about 10-15 minutes to set up..”

Samuel Tan M

Associate Director Regional IT at Cineplexes

[Read full review](#) 

“It is quite easy to set up Windows 10, as our tech team looks after this, and since we are an OEM, we have many tech specialists. The deployment and running of tools is not an issue..”

Ankur Jha

Business Risk Consultant at EY

[Read full review](#) 

“I would say the setup goes into hours. Somewhere between two to two and a half hours is a good time for the entire installation, having the OS up and installing some basic drivers. That's a safe bet..”

Deboprio Dutta

[Read full review](#) 

Software Engineer at NRI (Nomura Research Institute)

“The product's configuration and deployment phases are easy.

The time required to deploy the solution depends on the system hardware configuration and it would take a maximum of 20 minutes to complete..”

Nitesh Saxena

[Read full review](#) 

IT Manager at Avyaan Management

“The solution’s initial setup is easy. The deployment takes less than one hour.

On a scale from one to ten, where one is difficult and ten is easy, I rate the solution’s initial setup an eight out of ten..”

Bayu Jayasukma.

[Read full review](#) 

Cloud Product Specialist at PT. DATACOMM DIANGRAHA

“The solution’s initial setup is easy. Installing the operating system and setting up everything takes around one hour.

On a scale from one to ten, where one is difficult and ten is easy, I rate the solution’s initial setup an eight out of ten..”

Darko Borovic

Bussines System Administrator at Euronews

[Read full review](#) 

Customer Service and Support

“Windows 11 support is really good compared to Windows 10. But when I was using Windows 10, their support was a bit poor. They were not completely poor—their community is working a lot—but their support was a bit poor compared to Windows 11..”

Awais Sajid

Security Engineer at Secure Networks

[Read full review](#) 

“My company contacted the solution's technical support, who claimed that the blue screen appeared because some hardware failure issue might be causing the problem. I rate the technical support a seven out of ten..”

Nitesh Saxena

IT Manager at Avyaan Management

[Read full review](#) 

“I had an issue with Windows 10, so I contacted support from the US initially due to my location, but eventually found effective assistance from the support team in Saudi Arabia..”

MaAlk

Risk Analyst at King Faisal Specialist Hospital

[Read full review](#) 

“We are facing some challenges with Windows 11 where a pop-up appears when we enter the password. It asks if we want to change it or continue with the same, which is annoying. We have informed Microsoft, but the issue is still there, and it has been more than three to four months..”

Qayoum Sharpyade

Technology\Cloud Architect | IT Infrastructure Security & Compliance at IDFC Bank

[Read full review](#) 

“The IT department, specifically the ICT team, provides support for this. Several people are involved. They manage the computer rooms, including installation and updates. A new installation is required every year because students change. I manage computers, adhering to organizational rules..”

Roman Danel

Visiting professor at WSG Bydgoszcz

[Read full review](#) 

“We get support mostly from internet searches. Windows has some built-in diagnostics for network issues, printing problems, and so on. Sometimes, the analysis results or even failures from these tools lead you to different support homepages. I've found some helpful answers there, but it's not always clear whether it's an official Microsoft page or just a general support site.

On the other hand, Windows is so widely used that almost every problem has been encountered by someone else. There are usually multiple solutions or workarounds available online. So, in that sense, the support is pretty good. I've never actually had to contact a technical support rep directly..”

Akos Szirmai

Application Development Specialist at Field consulting Ltd.

[Read full review](#) 

Other Advice

I don't consider myself an expert on Windows 10; I'm just an end user for the operating system based on my experience. I'm not the right person to ask about Windows 10 security; my friends who are into security and identity management tell me that Windows security is not that good, and I honestly don't know about it. I would recommend Windows 10 to other users without hesitation. My overall rating for Windows 10 is 9 out of 10.

Rohan Dixit

Senior Engagement Manager at a tech vendor with 10,001+ employees

[Read full review](#) 

“If you are buying an operating system, consider your requirements. A server license may be needed for server-side work, and Windows 11 should be preferred for personal use. The world is upgrading, so upgrading our operating systems is essential. On a scale of one to ten, I would rate Windows 10 between four and seven because it does have the Xbox feature for gaming and streaming, although there are some limitations..”

AsgharAli

DevOps Engineer at CipherTV Corp.

[Read full review](#) 

“PLM is the main focus.

Aras PLM is a US-based company that can be found through searching.

The company name is spelled A R A S.

I rate this solution 9 out of 10..”

SATYAJEET VIKRAM KALE

BI Analyst at SGS systems Pvt Ltd

[Read full review](#) 

“I cannot provide any other security information because our colleague is in a different department.

“I am satisfied with Windows 10 security.

“On a scale of 1–10, I rate Windows 10 an 8..”

Pifu Lin

Senior System Engineer at DYNASAFE TECHNOLOGIES PTE. LTD.

[Read full review](#) 

“We use Gmail and Outlook a lot, and other than that, we use Drive and nothing else.

“We do not work with Cortana voice commands.

“You just have to ask for permission. I do not handle all this.

“Outlook works for us, and we mainly use Outlook and Google, and it is working well for us.

“It is the time thing itself, because we have time-intensive activities, so time zone differences affect us. This is me just trying to frame what my tech team has told me.

“On a scale of one to ten, I would rate Windows 10 an eight..”

Ankur Jha

Business Risk Consultant at EY

[Read full review](#) 

“I am not fully involved in technical work, and I may not be the most qualified person to provide feedback.

“Regarding licensing, I am using Windows 10 through my office and am not familiar with the details.

“I am not sure about virtual desktop functionality.

“The system is not integrated with other tools.

“I make use of the Edge browser and Chrome.

“Regular updates work fine.

“On a scale of 1–10, I rate Windows 10 a 9..”

About PeerSpot

PeerSpot is the leading review site for software running on AWS and other platforms. We created PeerSpot to provide a trusted platform to share information about software, applications, and services. Since 2012, over 22 million people have used PeerSpot to choose the right software for their business.

PeerSpot helps tech professionals by providing:

- A list of products recommended by real users
- In-depth reviews, including pros and cons
- Specific information to help you choose the best vendor for your needs

Use PeerSpot to:

- Read and post reviews of products
- Access over 30,000 buyer's guides and comparison reports
- Request or share information about functionality, quality, and pricing

Join PeerSpot to connect with peers to help you:

- Get immediate answers to questions
- Validate vendor claims
- Exchange tips for getting the best deals with vendor
