Product Recap

Barracuda Cloud-to-Cloud Backup

Barracuda Cloud-to-Cloud Backup Recap

Cloud-to-Cloud Backup provides comprehensive, cost-effective, scalable protection for your Office 365 data. It automatically backs up all your email, OneDrive for Business, SharePoint, Groups, and Teams data to Barracuda Cloud Storage. And when time is of the essence, restoring what you need takes just a few clicks.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

“Overall, I am a very satisfied user of Barracuda Cloud-to-Cloud Backup.”

Liam Trosad

Full Stack Developer at BairesDev

“Barracuda Cloud-to-Cloud Backup support is 10 out of 10. Once a customer buys any product, they can instantly get support from the Barracuda product serial number with this local team.”

Rajesh Makwana

Regional Pre Sales Engineer at Roundrobin Tech

“We've noticed fewer data losses by 90% compared to our previous tool since implementing Barracuda Cloud-to-Cloud Backup.”

Fridah Gilberto

Senior Network Engineer at KDIInfotech

✓ “Overall, I would rate Barracuda Cloud-to-Cloud Backup a nine out of ten.”

Jason Kirk

Microsoft 365 Konsult at Canmer Data AB

✓ “The product enables us to restore lost files.”

Graham Kingaby

Network Manager at Broughton High School

✓ “The initial setup is pretty simple.”

Johan Camp

ICT Manager at Jessa Ziekenhuis

✓ “The product is deployable anywhere. It is also scalable and reliable.”

JonMcWilliams

vCTO - Technical Account Manager at CMIT Princeton

What users had to say about valuable features:

“The product enables us to restore lost files. It is like a security blanket. In case we lose our files, we can get it back. It is relatively easy to manage backups. The tool has a user-friendly interface. The solution covers most things..”

Graham Kingaby

Network Manager at Broughton High School

“The most valuable feature of Barracuda Cloud-to-Cloud Backup is it's synchronized well with Microsoft 365. Additionally, the solution is able to identify through Microsoft Defender if there are viruses and will provide a notification..”

Verified user

IT Manager at a printing company with 51-200 employees

[Read full review](#) 

I find restoration and setup to be the most valuable features because they are easy to use, easy to find, and easy to set up for the first time. Restoration allows me to recover a single file or a whole library or folder quickly, with the option to restore to either the original location or a new location. The latest updates have improved user-friendliness, especially for business-to-business interactions, enabling me to handle backup restorations and setups efficiently for my customers.

Jason Kirk

Microsoft 365 Konsult at Canmer Data AB

[Read full review](#) 

“The features include easy setup, easy to use, and unlimited storage.

“Barracuda Cloud-to-Cloud Backup has positively impacted my organization by helping us with lost productivity when someone deletes a cloud-stored item and we can retrieve it easily. With wrong creation of Teams and no owners assigned, we get notified. It helps me worry less that in the worst-case scenario, mailboxes and Teams are easily restorable to continue with online learning at a very low risk. It also proves useful, for instance, where a user accidentally loses or deletes an important email or a file in the mailbox. The team can easily restore what has been lost..”

Liam Trosad

Full Stack Developer at BairesDev

[Read full review](#) 

“We are a master distributor for whole pan-India.

“The advantages can be attributed to DCDR purposes and the current data protection act. Globally, any country, right now even the Indian government, is approaching the data protection act where data must be stored in an Indian tenant. If any incident happens from a Microsoft outage, or account takeover or anything, a customer has a secondary copy separately, which is not connected by Microsoft. It is only a replication copy stored in an incremental backup. If once-in-a-while data from a higher authority department is lost, it can be restored anytime with this independent dependency without any Microsoft account access. Data can be restored from one user to an individual as an original user to another user.

“Encryption is part of that. Barracuda Cloud-to-Cloud Backup has committed to 256-bit encryption. Data-at-rest encryption is ensured once data is stored in Barracuda Cloud tenant, as it is already encrypted from back-end independent technologies or parameters. Once the account is logged in via multi-factor authentication from the IT admin, it will depend on who has role-based access in the company organization team or IT team. This depends on them for the restoration of the data or data access permission, and how they can manage the data processing of these tenant consoles. On the user side, there is no intervention. Users cannot access their data. They are compulsorily dependent on IT independent admins who can access this data if, under any circumstances, data is lost..”

Rajesh Makwana

Regional Pre Sales Engineer at Roundrobin Tech

[Read full review](#) 

“The ease of use and backup capability of Barracuda Cloud-to-Cloud Backup is great.

“The simplicity of the backup process provided by Barracuda Cloud-to-Cloud Backup is impressive.

“We are able to use all available options of the product: Exchange, Teams, OneDrive, and SharePoint.

“We have all our employees and clients covered in the backup.

“The product helps us to restore data lost either by mistake or possibly due to nefarious activity.

“Since we started using Barracuda Cloud-to-Cloud Backup, there has been some improvement.

“Especially, we have restored files in many incidents that would have required a lot of work to restore lost data.

“It's now safer to move data to Microsoft 365 as we are now sure that the data is backed up, which frees up resources needed for an on-premises data center.

“The product is a very cost-effective way to back up Microsoft 365 for all our users.

“We've noticed fewer data losses by 90% compared to our previous tool since implementing Barracuda Cloud-to-Cloud Backup.

“We've also seen an improvement in our security by 70%.

“We don't worry now; we have peace of mind, with no data breaches since we started using Barracuda Cloud-to-Cloud Backup..”

Fridah Gilberto

Senior Network Engineer at KDInfotech

Other Solutions Considered

“We have evaluated other solutions before choosing Barracuda Cloud-to-Cloud Backup. We choose this solution because it is cost-effective, good support, and easy to use..”

Verified user

IT Manager at a printing company with 51-200 employees

[Read full review](#) 

“The product rating is 10 out of nine or 10 out of eight. That is fine. Eighty percent of the time, once any customer closes the implementation and buys the license, they have no complaints about the product being very complex from the product support side..”

Rajesh Makwana

Regional Pre Sales Engineer at Roundrobin Tech

[Read full review](#) 

“Barracuda Cloud-to-Cloud Backup is not comparable to CloudGen Firewall because the customer's requirement is not fulfilled as of now as a UTM parameter or UTM trend, which was WatchGuard or other brands. CloudGen is for very multinational companies, which totally agreed about this parameter implementation about SD-WAN and everything. If it globally fulfills the requirement, then we can approach it..”

Rajesh Makwana

Regional Pre Sales Engineer at Roundrobin Tech

[Read full review](#) 

“Before choosing Barracuda Cloud-to-Cloud Backup, I evaluated other options such as Microsoft Defender XDR. The reason why I switched from Veeam Data Platform is because Barracuda is more cost-effective and secure. We wanted to protect all our users cost-effectively. Veeam might have more features, but the cost of licensing weighs in favor of Barracuda..”

Liam Trosad

Full Stack Developer at BairesDev

[Read full review](#) 

“We decided to switch from Veeam Data Platform to Barracuda Cloud-to-Cloud Backup because Veeam wasn't cost-effective compared to Barracuda Cloud-to-Cloud Backup.

“Barracuda Cloud-to-Cloud Backup also integrates well with our Barracuda backups, email protection, and impersonation protection products, with a simple portal to interface with all products..”

Fridah Gilberto

Senior Network Engineer at KDInfotech

[Read full review](#) 

ROI

Real user quotes about their ROI:

“Barracuda Cloud-to-Cloud Backup support is 10 out of 10. Once a customer buys any product, they can instantly get support from the Barracuda product serial number with this local team. We have locally in Made in India, Bangalore, but it is a global American team that will, within half an hour, get instant support. This includes initial support for how to run the setup, initiate the setup for the configuration, setup, auditing, or anything..”

Rajesh Makwana

Regional Pre Sales Engineer at Roundrobin Tech

[Read full review](#) 

“I have seen a return on investment as we have been able to save approximately 65% of our cost compared to the previous tool when we were using M365 for all users as our backup solution. It is now safer to move data from M365 as we are sure that the data is well backed up. This has freed up resources needed for an on-premises data center. We have also been able to restore files in many incidents that would have required end-users a lot of work to restore lost data. This has saved time and cost. It has also improved our data since we have not had any data loss since we started using this tool..”

Liam Trosad

Full Stack Developer at BairesDev

[Read full review](#) 

Use Case

“We are using Barracuda for our online office backup. It's for the backup of mailboxes and team SharePoint sites that we have with Azure and Office 365..”

Johan Camp

ICT Manager at Jessa Ziekenhuis

[Read full review](#) 

“We use the tool for our Microsoft 365 customers for their backup of Teams, OneDrive and SharePoint data. We also use it for data security and disaster recovery. .”

JonMcWilliams

vCTO - Technical Account Manager at CMIT Princeton

[Read full review](#) 

Our customers primarily use Barracuda Cloud-to-Cloud Backup for backing up Microsoft 365, including Microsoft Exchange email, SharePoint sites, OneDrive, and Teams data.

Jason Kirk

Microsoft 365 Konsult at Canmer Data AB

[Read full review](#) 

“Barracuda Cloud-to-Cloud Backup was previously named Email Protection and this edition is called Essentials. Currently, it is called Barracuda Email Gateway Defense, which they have configured as an edition-wise selling product. We are requiring majorly Barracuda Email Gateway Defense with cloud-to-cloud backup or for impersonation protection purposes or awareness training purposes.

“Cloud Archiver or Sentinel can be utilized for impersonation protections..”

Rajesh Makwana

Regional Pre Sales Engineer at Roundrobin Tech

[Read full review](#) 

“My main use case for Barracuda Cloud-to-Cloud Backup is that it is very easy to configure, manage, and restore items when needed. Barracuda Cloud-to-Cloud Backup is also very proactive at managing our account and has assisted us in validating the configuration for any new function that needed to be implemented.

“We utilize Barracuda Cloud-to-Cloud Backup to provide a more complete backup environment for our Office 365. It is one of the few solutions that backs up all our aspects, including Exchange, OneDrive, SharePoint, Teams, and our Entra ID. We are able to monitor the successful backups and then utilize the recovery feature when our users need to recover a file, folder, or an email easily..”

Liam Trosad

Full Stack Developer at BairesDev

[Read full review](#) 

“On our journey to bolster our cybersecurity and disaster recovery plans, we decided to purchase and implement Barracuda Cloud-to-Cloud Backup, as I always had it in the back of my mind that should the worst happen, our Office 365 data isn't being backed up and would be lost.

“Barracuda Cloud-to-Cloud Backup comes in with its extremely simple setup that allows us to connect to our Microsoft 365 tenancy, doing the heavy lifting for us.

“It instantly begins to create a backup schedule and then backs up all our mailboxes, our OneDrive accounts, SharePoint sites, and our Microsoft Teams.

“We are able to check restore from backup, export out of a backup, and create scheduled reports for specified users.

“Overall, it does everything for us when we need to have peace of mind that our data is being securely backed up.

“With cyber attacks constantly on the rise, and being a high-risk target, I find that Barracuda Cloud-to-Cloud Backup is perfectly suited for providing peace of mind that our organization's Microsoft 365 data is being securely backed up and easily recoverable..”

Fridah Gilberto

Senior Network Engineer at KDIInfotech

Setup

The setup process involves configuring and preparing the product or service for use, which may include tasks such as installation, account creation, initial configuration, and troubleshooting any issues that may arise. Below you can find real user quotes about the setup process.

Setting up an initial account involves some manual processes, which can feel outdated, but it may have been improved since my last setup. Once the account is set up, it works smoothly.

Jason Kirk

Microsoft 365 Konsult at Canmer Data AB

[Read full review](#) 

“The initial setup of Barracuda Cloud-to-Cloud Backup was simple and did not take a lot of time with the vendor support engineer. The deployment took approximately one day..”

Verified user

IT Manager at a printing company with 51-200 employees

[Read full review](#) 

“My experience with pricing, setup cost, and licensing is that the price is more cost-effective compared to an M365 backup solution. The setup was straightforward and easy..”

Liam Trosad

Full Stack Developer at BairesDev

[Read full review](#) 

“A customer can start using Barracuda by first obtaining a license. Once the license is activated, customers can load their data into the product. The documented article contains the steps for implementation. It takes 45 minutes to deploy. However, the backup time may vary depending on the amount of data. For example, a customer with 100GB of data per user may experience a backup time of an hour..”

Rajesh Makwana

Regional Pre Sales Engineer at Roundrobin Tech

[Read full review](#) 

“I would recommend Barracuda Cloud-to-Cloud Backup because it's very easy to configure, easy to manage, and easy to utilize when needing to recover data faster.

“We have seen some improvements since we started using Barracuda Cloud-to-Cloud Backup.

“The solution has allowed us to retain data for employees that are no longer with the company without requiring us to maintain any Office 365 licensing, making it very cost-effective.

“It helps me worry a little less that in the worst-case scenario, mailboxes and Teams are easily restorable to continue, at very least.

“It proves useful, for instance, where a user accidentally loses or deletes an important email or file in their mailbox or Teams, as what has been lost can easily be restored..”

Fridah Gilberto

Senior Network Engineer at KDInfotech

[Read full review](#) 

Customer Service and Support

“The support from Barracuda Cloud-to-Cloud Backup is great. They have Japanese support in Japan. Other vendors have support in China and the USA or other locations that are mostly in English. Having language support in Japanese and in our time zone is helpful..”

Verified user

IT Manager at a printing company with 51-200 employees

[Read full review](#) 

“The interface is user-friendly console access which is very accessible such that an L1 engineer or any non-technical person can manage this console regarding the parameter of how this data should be backed up daily. Users get the notification of how data can be restored. Reports about the daily backup completion or restoration can be obtained. Notifications are sent over email. Without any IT engineers, a customer IT team can manage that. There is no complexity for this manageability purpose..”

Rajesh Makwana

Regional Pre Sales Engineer at Roundrobin Tech

[Read full review](#) 

“The user interface of Barracuda Cloud-to-Cloud Backup is very intuitive and user-friendly, and I have no problem with that.

“The customer support is very responsive and proactive, which I encounter no issues with.

“The customer support for Barracuda Cloud-to-Cloud Backup is very proactive and easy to access, 24/7, and they are very helpful..”

Fridah Gilberto

Senior Network Engineer at KDInfotech

[Read full review](#) 

Other Advice

“The solution does not require any particular maintenance.

I would strongly recommend this solution to others.

I would rate Barracuda Cloud-to-Cloud Backup a ten out of ten..”

Verified user

IT Manager at a printing company with 51-200 employees

[Read full review](#) 

“The platform is good for any customer who is moving to Barracuda products. Its portfolio has been growing and evolving quickly. It is a full-featured vendor that can provide a good solution for various needs.

Overall, I rate it a nine out of ten..”

Rajesh Makwana

Regional Pre Sales Engineer at Roundrobin Tech

[Read full review](#) 

“I give the solution ten out of ten.

The solution's ransom protection and ease of recovery are great. The solution can be installed on-premises or as a hybrid prem and cloud.

I recommend you study and familiarize yourself with the solution before implementing it to assure everything goes smoothly..”

Nawaaz Toonah

Operations Manager at Cybernaptics

[Read full review](#) 

“A quick, specific example of a time I used Barracuda Cloud-to-Cloud Backup to restore something is when we have been able to retain the backups for as long as we need them. It allows us to easily locate files, folders, emails, accounts, or email messages to restore them. For a scenario where we needed to restore some data from a previous employee who was recently working at our organization but whose contract was terminated and who had deleted all the files, we wanted to recover all the files and data. Barracuda Cloud-to-Cloud Backup solution helped us to recover everything, and the data was successfully recovered.

“The advice I would give to others looking into using Barracuda Cloud-to-Cloud Backup is that for its price, Barracuda Cloud-to-Cloud Backup is very cost-effective compared to other alternatives. For any organization looking to bolster their data protection, recover any lost data, and overall have unlimited data storage, Barracuda Cloud-to-Cloud Backup is the best tool to use.

“Overall, I am a very satisfied user of Barracuda Cloud-to-Cloud Backup. This product has helped us to restore data lost either by mistake or possibly due to nefarious activity. It has been a game-changer tool in my organization. I gave this product an overall rating of 8 out of 10..”

Liam Trosad

Full Stack Developer at BairesDev

[Read full review](#) 

“We have been using this product for more than 12 to 13 years.

“Majorly, issues arise due to an outage or unethical data deletion by users as an end-user or human error. If there is a Microsoft outage, the customer does not have any plan. Even if a customer is using a basic plan, like E1, which has only a retention period where once data is deleted from the IT guys or anyone, it only has a 90-day retention period. Barracuda Cloud-to-Cloud Backup gives an unlimited retention policy for the backup for all the parameters. That is the first point. The drill-down on the parameters, if customers do not plan for any endpoint backup for the separate user implementation, that is why it is very easy for deployment for any end-users who are coming from, right now after working from home due to COVID-19. The main purpose of this OneDrive data from the customer perspective is all the data should be stored on a OneDrive tenant. They do not have any dependency on the OneDrive data for individual computers and users, whether they were connected online or not.

“Improvement, right now, as per the Microsoft inventions about the technologies, accordingly Microsoft and Barracuda Cloud-to-Cloud Backup are both integrated with each other. Accordingly, once Microsoft gets any advantages for the backup or any IT circumstance modules, they can integrate accordingly. The overall review rating for this product is 9 out of 10..”

Rajesh Makwana

Regional Pre Sales Engineer at Roundrobin Tech

[Read full review](#) 

“The cost is also very transparent and cost-effective.

“Barracuda Cloud-to-Cloud Backup's pricing is very cost-effective and affordable, making it accessible for every organization, especially because it boosts productivity and the security of the data, so it's essential in every organization.

“The setup is very straightforward and easy, and the customer support is always available in case anything is not straightforward.

“You can reach out to them, and they will be of great help.

“I rate Barracuda Cloud-to-Cloud Backup nine out of ten because this solution has really helped us.

“We have been able to restore files in many incidents that would have required end-users a lot of work to restore lost data, hence saving us time and cost.

“We've also seen increased security compared to Microsoft 365, which was also very expensive compared to Barracuda Cloud-to-Cloud Backup..”

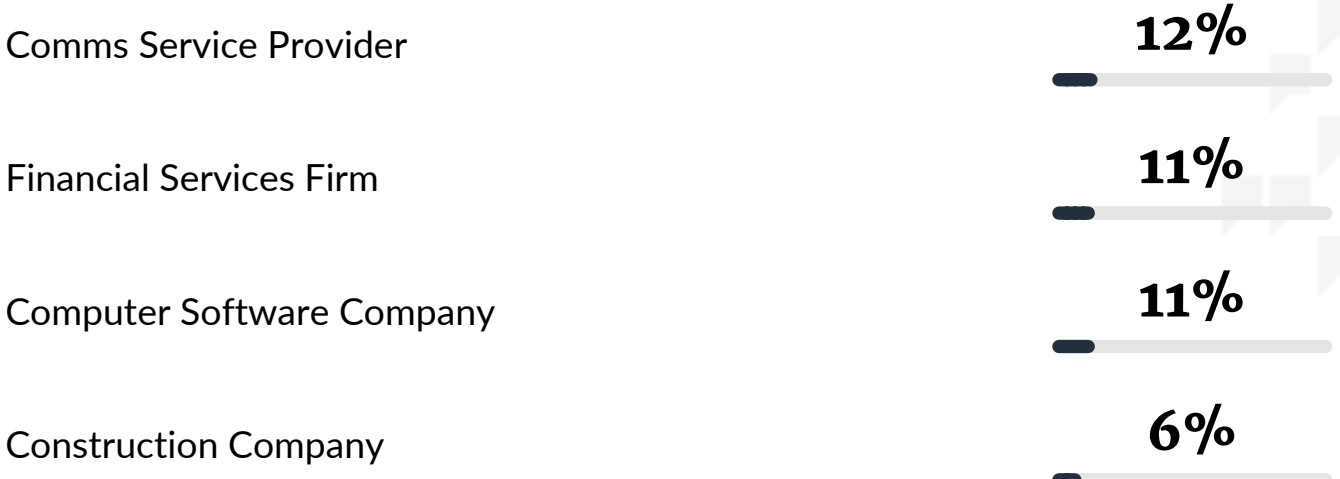

Fridah Gilberto

Senior Network Engineer at KDIInfotech
