Product Recap

Domo

Domo Recap

Domo provides self-service BI, enabling users to generate reports without needing a data warehouse. Its cloud-based nature enhances accessibility and performance, while offering customizable dashboards for data-driven decision-making.

Domo stands out for its robust data integration, featuring Magic ETL to streamline processes. Its AI-driven insights, extensive data connectors, and collaboration tools promote secure sharing and analytical proficiency. Although users note room for improvement in visualization, pricing, and data integration, its capabilities in generating executive dashboards and unified analytics remain prominent. Performance and user experience enhancements are desired, including improved support for large data volumes and richer data transformation tools.

What are the key features of Domo?

- **Self-Service BI:** Generate reports without a data warehouse for simplified analysis.
- **Data Integration:** Leverage Magic ETL for easy data management.
- **Customizable Dashboards:** Tailor dashboards to specific needs.
- **AI-Driven Insights:** Gain automated insights for better decision-making.
- **Extensive Data Connectors:** Access a wide range of data sources.

What benefits should users look for when evaluating Domo?

- **Accessibility:** Cloud-based structure ensures data access anywhere.
- **Performance:** Enhanced performance with seamless data processing.
- **Collaboration:** Facilitate secure sharing and collaboration for collective insights.
- **Decision-Making:** Enable data-driven decisions with real-time analytics.

In industries like finance, marketing, project management, and retail, organizations use Domo for crafting executive dashboards, integrating data sources, and conducting advanced analytics. Its capabilities allow them to transform data into insightful dashboards, aiding in performance tracking and actionable insights.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

- ✓ “My favorite feature in Domo is Beast Mode, and we have Insights; when asking insights on the right side of the dashboard, we create insights, and if I ask questions in segments, they provide more information regarding the dashboard and data set.”

Ruban Prasanna Dass SP

Assistant Manager at a tech services company with 10,001+ employees

- ✓ “The one thing that stands out in case of Domo is that you have everything under the same tool; you don't have to log in into any particular cloud services to have access to that platform as it's just a web-hosted platform and everything related to data engineering, data science, ETL, everything comes under the same umbrella.”

Manthan J.

Data Analyst at Anonymous

- ✓ “The flexibility and usability are probably the best features, and I really appreciate what they're doing now with workflow and AI agents, allowing users to build that kind of agentic flow where data analytics and traditional ETL can quickly and easily embed AI capabilities, which is extremely powerful.”

Dave Ramos

Chief Technology Officer ? Chief Product Officer ? Fractional CTO ? Board Advisor at a wellness & fitness company with 1-10 employees

- ✓ “There are many valuable features, especially the charts and graphs that make it easy to pass information to people that are not really technical.”

Samuel Adeyemo

Founder & CEO at AI-OT

- ✓ “When it comes to Domo, we have one platform for data integration as well as for data modeling, transformations, and creating visualizations such as charts, graphs, and cards, which is beneficial because in Power BI we have multiple modules for these functions.”

Balaraju B

Power BI developer at Unemployed

“What I appreciate most about Domo is that it's the simplest visualization tool, not complex at all, and it has a very simple interface making it easier for teams to adopt.”

Koushik Jain

Product Analyst at ASBL

“The most ideal aspect about using Domo is it can accommodate a huge amount of data, and we loved the number of sources it provides in a single platform, such as the capability to connect it.”

BijayKumar

Senior Analyst at Blend360

What users had to say about valuable features:

“The flexibility and usability are probably the best features. I really appreciate what they're doing now with workflow and AI agents, allowing users to build that kind of agentic flow where data analytics and traditional ETL can quickly and easily embed AI capabilities, which is extremely powerful.

“As a cloud-hosted platform, scale is not an issue aside from cost, which relates to credit consumption. Scaling is Domo's concern, not mine. I've never had an issue with scaling it, and I've scaled it rapidly in multiple organizations. The only concern has always been the budget and licensing tier..”

Dave Ramos

Chief Technology Officer  Chief Product Officer  Fractional CTO  Board Advisor at a wellness & fitness company with 1-10 employees

“The one thing that stands out in case of Domo is that you have everything under the same tool. You don't have to log in into any particular cloud services to have access to that platform. It's just a web-hosted platform. Everything related to data engineering, data science, ETL, everything comes under the same umbrella. You can do it on the same platform. We have different connectors to connect with different data sources, and these connectors are pretty much available for each and every data source in the industry.

“It's pretty much understandable for any non-technical user to make use of the dashboards that are prepared. As the end goal of most of the end goals or end products of any use case in Domo leads to creation of any report or a dashboard that can be understood by any non-business, non-technical person..”

Manthan J.

[Read full review](#) 

Data Analyst at Anonymous

“The best features Domo offers are that it is easy to use.

“Domo is easy to use for me because the entire UI is intuitive and straightforward.

“Domo has positively impacted my organization by giving everyone the ability to see different data cards and make decisions quicker without relying on BI.

“The change in decision-making due to Domo has definitely resulted in time savings and giving people more power..”

Verified user

[Read full review](#) 

Marketing Manager at a construction company with 501-1,000 employees

“These are the advantages because it saves our time. In Power BI, if we want to build a dashboard, we have to go to another site, log in, and create the dashboard. In Domo itself, we can build the dashboard, and if someone wants to change something on the dashboard, they can simply log into Domo, make changes, and pass the information to the required person. In Power BI, it takes more time because we need to log in, change information on the report, and share it again.

“I have mostly used data table, bar chart, and line chart features, as these are the ones I have used in most cases.

“When using a data table, if I want to visualize or get more data onto the dashboard with a large number of columns, using a bar chart or line chart can make the dashboard look clumsy. I have used a data table because it gives the complete information of required columns, such as sales or expenses..”

Balaraju B

[Read full review](#) 

Power BI developer at Unemployed

“The most ideal aspect about using Domo is it can accommodate a huge amount of data. Apart from that, we loved the number of sources it provides in a single platform, such as the capability to connect it. These were the two major reasons we stayed with Domo for some time.

“Domo helped our team work more effectively. None of the other tools provide the kind of support that enables chatting and working on the same item simultaneously. In other tools such as Tableau or Power BI, you keep sharing the latest version of the dashboard and then someone else keeps updating. Working at the same time on the same dashboard is possible on Domo.

“The Domo data visualization feature is situational. The type of dashboard and the type of data that I'm planning to represent to whatever KPI suits the picture. Another thing I appreciated in the dashboards was filtering within the chart itself. You can keep filtering on at two, three levels within the chart without moving out of the dashboard..”

BijayKumar

Senior Analyst at Blend360

[Read full review](#) 

“Domo is quick and has a name for itself. Even way back, companies such as DHL have been using it and we do a lot of distribution with DHL in Africa, specifically in Nigeria. The fact that you can integrate it with CRM platforms itself and there's a special feature that enables you to utilize AI is beneficial. You can use AI to create AI agents and utilize it with CRM software such as Salesforce, which is a very big addition to it.

“Having Domo on your phone makes it more feasible for our staff to handle data on the go, rather than being stuck in one place carrying a PC.

“There are many valuable features, especially the charts and graphs that make it easy to pass information to people that are not really technical. Just by looking at the charts and graphs, it is really comprehensive. There's also the dashboards, the interactive dashboard features, and the maps. An AI-powered feature helps to automate tasks and provide good insights..”

Samuel Adeyemo

Founder & CEO at AI-OT

[Read full review](#) 

Other Solutions Considered

“The key differences between Domo and other BI products are mainly in the UI and UX, along with the way users interact. It has more attractive presentation, display, and dialog presentation compared to other BI tools..”

Verified user

Senior Engineer at a tech services company with 10,001+ employees

[Read full review](#) 

“I have faced some challenges because previously I was working on Power BI. When I switched companies and started using Domo, transforming knowledge from Power BI to Domo came with difficulties. I overcame these hurdles and gained knowledge through my colleagues, Domo University, and Domo Palooza by learning from articles..”

Balaraju B

Power BI developer at Unemployed

[Read full review](#) 

“It was just between Domo and Salesforce because there's overlap between CRM software and BI software, though BI has more functionalities. For our company, we had to weigh if there were things Salesforce could do that Domo couldn't do. Domo can do everything Salesforce can do. We realized we may not really need to use Domo. We could just use Salesforce to handle our data and everything..”

Samuel Adeyemo

Founder & CEO at AI-OT

[Read full review](#) 

“Domo is a completely integrated tool. We don't have to have any access to a particular cloud to log into their services. They have their own instances that are allocated to different clients. We can make use of it directly. That is one advantage that I can think of. Apart from that, in terms of functionalities, it is pretty much the same that is available in each and every tool..”

Manthan J.

Data Analyst at Anonymous

[Read full review](#) 

“We have opted to go away from Domo. We selected Sigma because of the price, along with our extensive use of input tables and Excel-focused sort of view.

Currently, my team, which consists of only a handful of people, went to Domopalooza and saw their latest and greatest offerings. We can replicate all of that, so it makes sense for us to own our data and own our AI and to build it so that it functions..”

Kenneth Lines

[Read full review](#) 

Senior Director of Data Analytics at a educational organization with 201-500 employees

“I have worked on some platforms ranging from Databricks. I have worked with Power BI, Tableau, SQL, MySQL, it's a data engineering tool that we can make use of. I have worked with ClickHouse as well. I'm a certified ClickHouse developer, so we make use of that..”

Manthan J.

ROI

Real user quotes about their ROI:

“The return on investment is there, but if we can do the same thing for \$100,000 less, then it's not a good return investment compared to the other alternative..”

Kenneth Lines

Senior Director of Data Analytics at a educational organization with 201-500 employees

[Read full review](#) 

“I think the ROI was a month and a half. It was really fast. Not only did I get seven people in the day-to-day aggregation of financial data, but they went from quarterly reports to real-time data. So that is something we could not measure..”

BrianKing

Independent IT consult at Kings adventure centure

[Read full review](#) 

“One of our clients, for example, sees on a monthly basis how much money they are saving, on a cumulative basis. They say a certain type of conversion was only at 40 percent and now it has increased to 65 percent..”

Verified user

Senior Reporting Analyst at a outsourcing company with 1,001-5,000 employees

[Read full review](#) 

“I haven't personally looked at the ROI point of view as I am a technical user of it. I do technical stuff. I analyze data, transform it, do data engineering stuff. In terms of ROI, the company that I'm working for, the business users or the business head takes care of it, so I won't be able to answer that..”

Manthan J.

Data Analyst at Anonymous

[Read full review](#) 

“In the past, we've seen ROI, especially because Domo pricing structure is not really based on how much you use it. It's based on the functionalities that you're accessing on their platform on the cloud-based platform. Domo can charge as much as \$100,000. If you're actually using Domo at a very limited case and you're being charged \$20,000, we've seen ROI there, but once it goes really high, you really need to check your metrics and check your profit..”

Samuel Adeyemo

Founder & CEO at AI-OT

[Read full review](#) 

“We have seen ROI with Domo. For example, our finance team invested in Domo and they have saved around 20 days per month. They are now working more efficiently and their numbers have drastically changed compared to their previous year's performance. They can see how they're trending for the last month and they're efficiently planning their expenditures and forecasting accordingly.

Similarly, for our technology teams, we are doing different SLA metrics for incidents, problems, their availability, storage, etc. At one go they are now able to see the problem areas that are not performing and they can plan their technology maintenance accordingly. For some of the organizations within our company, their availability was around 91 percent. Against the standard of 99.9 percent available, they were losing 8 percent per month, which was going to cost us a lot in terms of penalties. They have identified their problem areas now and they are avoiding paying penalties.

Each of our internal customers has its own ROI like that..”

Use Case

“I use Domo for multiple projects. I have created various projects in Domo directly through their website. Currently, I'm working for Movid Technology in India. We have created multiple projects in Domo. The major part is invoicing, and we have BT reports, incorporating sales reports. Overall, we are working in telephonic domains..”

Ruban Prasanna Dass SP

Assistant Manager at a tech services company with 10,001+ employees

[Read full review](#) 

“My main use case for Domo involves building different tables and different cards so I can look at different data points.

“A quick specific example of a table I have built or a data point I often look at is churn. I look at churn often to see how things are going..”

Verified user

Marketing Manager at a construction company with 501-1,000 employees

[Read full review](#) 

“I have used Domo at various organizations. I was a very early adopter of Domo at one of my early organizations when Domo was still in stealth mode as a startup. It has progressed since then, and I worked closely with the Domo team to help build different product capabilities before bringing it into other organizations.

“Currently, I use it for my own small business to perform general analytics. I also implement embedded pipelines where I use machine learning and AI to understand consumer intent and action..”

Dave Ramos

[Read full review](#) 

Chief Technology Officer ☐ Chief Product Officer ☐ Fractional CTO ☐ Board
Advisor at a wellness & fitness company with 1-10 employees

“My job is to build dashboards from scratch to end, from data integration and data modeling, using Magic ETL for data transformations, and creating cards by using data analyzer, and building cards using multiple cards such as charts, line charts, multi-line charts, and bar charts. My job combines everything from scratch to end for implementing securities such as row-level securities, PDP (Personalized Data Permissions), and giving access to end users, managers, or stakeholders. This is the end-to-end process which I have done for my clients.

“I have worked on multiple BI tools, including Domo, Power BI, and Smartsheet. When it comes to Domo, we have one platform for data integration as well as for data modeling, transformations, and creating visualizations such as charts, graphs, and cards, which is beneficial because in Power BI we have multiple modules for these functions. Inside Domo, we don't have too many modules for creating visualizations, which I have noticed while using it. When it comes to sharing reports or dashboards, with Domo, we can customize dashboards as per the requirement and share them with other stakeholders..”

Balaraju B

Power BI developer at Unemployed

[Read full review](#) 

“My company has been using Domo for quite a while, for a very long time. Domo became popular to us in 2019, so we've been using Domo since then, in early 2020s, so downwards.

“I'm the CEO of AIOT and I'm the one leading an e-commerce line for one key in Africa. We use Domo for data management. It was something we were heavily using before, but we are not relying on it anymore. We've moved to CRM platforms such as Zoho Corporation. In the past, for data management, we sampled a lot of data and transformed it into useful information that helped to upscale our businesses. We use it on behalf of certain people that have a lot of data, certain companies, to have a form of data sampling and for us to turn information into actions that are quite productive.

“When I first started, my company has really grown. Back then, it was just me and one of my staff that is no longer with us. He was the one that did the handling and everything and I was just there monitoring. We were just two of us..”

Samuel Adeyemo

Founder & CEO at AI-OT

[Read full review](#) 

“I use Domo mostly for ETL purposes and dashboarding purposes. Data engineering, data analytics, data science, everything related to data. It's an integrated business intelligence tool. You can connect your data from various sources, transform them into the tool, display it on the dashboard to get meaningful insights.

“Effectively, we have done some projects for different customers on the platform and the effectiveness is in the sense of automation of different kinds of reports that the customers want to see. Frequently updating data sources and the data should be updated on a frequent basis. It can be on a daily basis, hourly basis, the data can be refreshed and accessed by the teams in the sense that they want to use it for their business processes. They want to have the latest insights, KPIs delivered to them.

“Decision making, for example, there can be some warehouse data that needs to be updated and some decisions need to be taken based on what kind of stock replenishment a particular customer wants to do in their warehouse. The decisions can be taken by looking at the refreshed data, the calculations that are done. What is the expected forecast of the stock that might need to be stocked up inside the platform, in the warehouse. This was one of the use cases. Related to this, there can be multiple other things which can be made use of. A customer can look at a particular KPI and make a business decision which can benefit their company in terms of reducing costs and maximizing profits.

“Domo analyzer has multiple charts. There are hundreds of charts we can choose from to display our data. It depends on what the customer wants to see and how the interpretation of the KPI needs to be made.

“We can create our own automotive agents inside the platform as well. AI agents for automating some tasks. We can make use of that.

“It's pretty much useful in cases where we want to forecast a time series kind of data where the future forecast depends on some time value. The capabilities of Domo to predict for future forecast is pretty good and we can make use of it.

“Mobile accessibility allows us to give different alerts and notifications to the end

users about changes happening in their data, if there are any threshold values that are changing and need the attention of the end user. We can alert them on their mobile phones. They can also view the dashboards or the reports that we have created on their mobile apps..”

Setup

The setup process involves configuring and preparing the product or service for use, which may include tasks such as installation, account creation, initial configuration, and troubleshooting any issues that may arise. Below you can find real user quotes about the setup process.

“The initial setup is the easiest thing to get into a total tangle-weave, similar to a cat's cradle nightmare. It is really easy to do, but difficult to do well..”

Kenneth Lines

[Read full review](#) 

Senior Director of Data Analytics at a educational organization with 201-500 employees

“At first we started to use on-premises, then moved to cloud-based because it saves space, saves data, and saves stress. It's better for them to handle all the challenges, so it's cloud-based..”

Samuel Adeyemo

[Read full review](#) 

Founder & CEO at AI-OT

“The initial setup of Domo is straightforward and not particularly difficult. When compared with other tools Power BI and Tableau, it is somewhat more complex, but it remains reasonably straightforward..”

Koushik Jain

Product Analyst at ASBL

[Read full review](#) 

“In terms of the setup, you just need to have a login ID and password. Or there can be a single SSO sign-on process. It's pretty easy. Setup from a technical perspective, we have to pull data from different sources and make changes on it, but it is not something that a non-technical person needs to look at. It can be handled by some data engineers or data analysts..”

Manthan J.

Data Analyst at Anonymous

[Read full review](#) 

“The initial deployment cost in Domo is higher compared to Power BI or Tableau. That's one difficult aspect of Domo. Otherwise, it is very good.

“The initial deployment was very easy for me when I started working with Domo three years ago. Though I was new to the Domo platform, I knew some SQL coding basics, so I could easily access ETL and Beast Mode. I learned quickly in a short period of 20 days..”

Ruban Prasanna Dass SP

[Read full review](#) 

Assistant Manager at a tech services company with 10,001+ employees

“The setup is very simple with a completely service-based model. It's very easy to use, starting from uploading Excel files or simple data files to begin analytics and then building in capabilities.

“When I ran data strategy for Rakuten, which was early on when I was working with Domo during their stealth mode, I scaled Domo from no user base to 50% of the organization, over 6,000 users, in a year. This was accomplished by creating a governed area for corporate data, and Domo's structure allows business users to perform their own analytics without needing BI teams and dedicated analytics teams. This results in a low barrier for rapid adoption..”

Dave Ramos

[Read full review](#) 

Chief Technology Officer  Chief Product Officer  Fractional CTO  Board Advisor at a wellness & fitness company with 1-10 employees

Customer Service and Support

“I did not reach out much to Domo support, but a few seniors of mine who reached out found it satisfactory. Their general experience was good. Domo's support can be rated nine or ten on a scale of one to ten..”

BijayKumar

Senior Analyst at Blend360

[Read full review](#) 

“I haven't escalated any questions to Domo technical support because whenever I had any query, it was resolved through the FAQ section. I didn't need to contact technical support..”

Koushik Jain

Product Analyst at ASBL

[Read full review](#) 

“I have contacted their customer support two times. In one instance, we discussed the issue of having time format, text format, and percentage in the same column format that needed segregation. They mentioned they would develop that facility in the future. Support-wise, they are good..”

Ruban Prasanna Dass SP

Assistant Manager at a tech services company with 10,001+ employees

[Read full review](#) 

“I have used the customer service, but it's still a new feature. We used it before, but we haven't currently used it for some period.

“I haven't used the solution recently..”

Samuel Adeyemo

Founder & CEO at AI-OT

[Read full review](#) 

“I have raised a few tickets in the tech support and the tech support is pretty brilliant when it comes to solving technical problems. The problems are taken care of in a very prompt manner. They are solved pretty decently as far as the complexity is concerned. No matter how complex the problem is, it can be taken care of by the support team. The support team is pretty brilliant..”

Manthan J.

Data Analyst at Anonymous

[Read full review](#) 

“It's very easy to get technical support from Domo. They make it readily available with chat functionality right within the platform. Even on a lower tier, you get technical support, though response time differs based on the tier. Getting technical support is straightforward – you can chat within the Domo platform when you're stuck, and someone will reply. On a freemium tier, responses might take an hour, two hours, or next day, but support always responds.

“Premium support, which I've had in the past, has been excellent. I would rate their support as eight or nine out of ten..”

Dave Ramos

[Read full review](#) 

Chief Technology Officer & Chief Product Officer & Fractional CTO & Board Advisor at a wellness & fitness company with 1-10 employees

Other Advice

“I have used Domo University and Domo Palooza for learning. I don't have access to the mobile version as only managers have access. I am currently working as a Power BI developer with Aregano Technologies. I have four years of experience in BI and would categorize myself as a freelancer or consultant. My review rating for Domo is 9 out of 10..”

Balaraju B

Power BI developer at Unemployed

[Read full review](#) 

“If you want everything inside one hood, you don't have to think about a lot of services as far as cloud is concerned. You don't have to think about the storage, you don't have to think about buying different cloud services, then you should go for Domo as everything comes under the same umbrella. You just have to think about the cost part.

“I would rate Domo 9.5 out of 10..”

Manthan J.

Data Analyst at Anonymous

[Read full review](#) 

“Learning is a steady curve, so you need to give it time, you need to take your time. Don't just try to put immense data in your head at once or try to learn all the aspects of Domo at once. Just take it slow and steady. The more you try certain aspects and you see how it turns out for your business, you get more inclined to use it. Just take it one step at a time.

“Because of the new AI features, I rate Domo as seven out of ten..”

Samuel Adeyemo

Founder & CEO at AI-OT

[Read full review](#) 

“Mobile accessibility to Domo provides significant benefits as mobile features make it simpler to review visualizations. If any bug occurs or a critical situation arises at odd times, our product team can examine the dashboard and confirm the situation, making it feasible to discuss across teams.

“If organizations are considering Domo, they should proceed with implementation. It is very simple to use, has a simple interface, and teams will find it easy to adopt. That would be my recommendation. On a scale of 1-10, I rate Domo an 8..”

Koushik Jain

Product Analyst at ASBL

[Read full review](#) 

“I am working in a good company as a customer and user of Domo, without any partnerships. We have two professional consultants working with us.

“Domo can contact me regarding this review through their community platform, where I directly chat and sort out issues. Many people are active in community chats, and I search for details there when needed.

“On a scale of 1-10, I rate Domo an 8..”

Ruban Prasanna Dass SP

Assistant Manager at a tech services company with 10,001+ employees

[Read full review](#) 

“I did not use Domo's self-service analytics tools because I was serving a client, so the self-service use cases were not enabled. That was not in our use case.

“I did not use Domo's AI-driven analytics or insights for uncovering trends or forecasting outcomes. I was using Domo before the latest update, and I no longer use Domo as I'm working with a different client.

“I did not use mobile accessibility with Domo.

“I rate Domo 8 out of 10..”

BijayKumar

Senior Analyst at Blend360

About PeerSpot

PeerSpot is the leading review site for cloud, AI, and business software. We created PeerSpot to provide a trusted platform to share information about software, applications, and services. Since 2012, over 22 million people have used PeerSpot to choose the right software for their business.

PeerSpot helps tech professionals by providing:

- A list of products recommended by real users
- In-depth reviews, including pros and cons
- Specific information to help you choose the best vendor for your needs

Use PeerSpot to:

- Read and post reviews of products
- Access over 30,000 buyer's guides and comparison reports
- Request or share information about functionality, quality, and pricing

Join PeerSpot to connect with peers to help you:

- Get immediate answers to questions
- Validate vendor claims
- Exchange tips for getting the best deals with vendor
