Sharepoint 2010 on Windows server 2012r2-24x7

# Sharepoint 2010 on Windows server 2012r2-24x7 Recap

Sharepoint 2010 on Windows Server 2012r2-24x7 features robust security, seamless Microsoft integration, and workflow automation, enhancing collaboration, file sharing, and document management.

Organizations leverage Sharepoint 2010 on Windows Server 2012r2-24x7 for online data storage and efficient business process automation. It offers improved communication and secure file sharing through real-time collaboration and mobile access. While the platform increases productivity with version history and access control, areas such as offline functionality and performance enhancement need focus. The outdated user experience and limited browser support are aspects requiring attention.

## What are the key features of Sharepoint 2010 on Windows Server 2012r2-24x7?

- **Security:** Advanced access control and permission management.
- **Integration:** Compatible with Microsoft Office and Teams for enhanced file access.
- **Collaboration:** Real-time collaboration and mobile access for improved teamwork.
- **Automation:** Workflow automation simplifies task management.

## What benefits and ROI can users expect when using Sharepoint 2010 on Windows Server 2012r2-24x7?

- **Cost Savings:** Streamlined communication reduces expenses.
- **Productivity:** Efficient task management enhances workflow.
- **Easy Onboarding:** Simplified processes for new team members.

In specific industries, Sharepoint 2010 on Windows Server 2012r2-24x7 is utilized for secure document management and collaboration. Manufacturing companies use it for managing complex workflows and storing files securely. In healthcare, it supports data consistency and real-time collaboration to ensure quality patient care.

# Valuable Features

Excerpts from real customer reviews on PeerSpot:

- ✓ “My main use case for Sharepoint 2010 on Windows server 2012r2-24x7 is that it serves as a great collaboration tool.”

**Catherine Melody**

Team Lead at Target

- ✓ “There is definitely an improved turnaround because of using Sharepoint 2010 on Windows server 2012r2-24x7.”

**Cliff Osborne**

Application Developer at El Camino Hospital

- ✓ “Sharepoint 2010 on Windows server 2012r2-24x7 positively impacts my organization overall through time-saving, cost reduction, and improved collaboration, particularly by eliminating delays for approvals when managers are not on-site.”

**Kelghazouli Rasuli**

Group IT Director at Premier Group

## What users had to say about valuable features:

“The best features Sharepoint 2010 on Windows server 2012r2-24x7 offers include permission management, contact groups, version history, and integration with other Microsoft tools.

“Of those features, I find the integration with the Microsoft tools most valuable on a daily basis. The workflows that connect Outlook, Sharepoint 2010 on Windows server 2012r2-24x7, and OneDrive among others allow me to manage multiple actions for all these tools, which seems wonderful to me. It allows a super necessary and simple expansion to be able to automate tasks that used to be performed manually on a daily basis. It certainly contributes to efficiency and time-saving..”

**Catherine Melody**

Team Lead at Target

“In my experience, the best feature Sharepoint 2010 on Windows server 2012r2-24x7 offers is the workflow, as it can be used to automate any kind of forms or any kind of paperwork that requires multiple approvals.

“The workflow feature specifically helped my team by not only improving efficiency but also impacting our costs, as it saved on printer, paper, and ink consumption while allowing managers to approve requests from anywhere at any time.

“Sharepoint 2010 on Windows server 2012r2-24x7 positively impacts my organization overall through time-saving, cost reduction, and improved collaboration, particularly by eliminating delays for approvals when managers are not on-site..”

**Kelghazouli Rasuli**

Group IT Director at Premier Group

“I appreciate the way Sharepoint 2010 on Windows server 2012r2-24x7 allows you to set up workflows. The custom apps were particularly useful. Without the simplicity of creating these custom workflows in Sharepoint 2010 on Windows server 2012r2-24x7, I would have had to write custom applications, which obviously would have taken more time and effort for such a simple need.

“There is definitely an improved turnaround because of using Sharepoint 2010 on Windows server 2012r2-24x7. Because the workflow is automated, any effort made to share files with people was reduced to virtually zero since they are automatically granted access to resources or by submitting their request for access. Instead of a user or staff member having to manually email files or provide links, they simply clicked a button to approve access. This greatly improved efficiency and reduced the time to provide that information, especially when it was automatic where there was no human intervention required, just Active Directory control.

“The collaboration in Sharepoint 2010 on Windows server 2012r2-24x7 has been extremely helpful. I am not sure how we would share some of these resources as easily with another solution, especially being able to control who can access what at different levels and who can edit which files, who can upload, and who can see different things. This has been very useful..”

**Cliff Osborne**

Application Developer at El Camino Hospital

# Other Solutions Considered

“Before choosing Sharepoint 2010 on Windows server 2012r2-24x7, I did not evaluate other options because we were already working with Microsoft products, so I decided to go with that..”

**Kelghazouli Rasuli**

Group IT Director at Premier Group

# ROI

Real user quotes about their ROI:

“I have seen a return on investment as it has eliminated using different tools among different teams, leading to harmonization, simplification, and improved collaboration..”

**Catherine Melody**

Team Lead at Target

# Use Case

“My main use case for Sharepoint 2010 on Windows server 2012r2-24x7 is that it serves as a great collaboration tool. Sharepoint 2010 on Windows server 2012r2-24x7 is being used for document management across the whole organization. It is majorly used for collaboration purposes. Documents and files can be easily accessed using Sharepoint 2010 on Windows server 2012r2-24x7. It provides other amazing functionality like searching, tracking, and managing documents and files..”

**Catherine Melody**

Team Lead at Target

“I use Sharepoint 2010 on Windows server 2012r2-24x7 to automate paperwork using workflows, share documents between users, and create forms using Sharepoint lists while automating these forms with workflows.

“An example of a process I automated with Sharepoint workflows is the petty cash form, where users fill it out for approval from their manager, which then gets sent to finance for review, CFO approval, and notifications are sent to the user at each step.

“I use Sharepoint 2010 on Windows server 2012r2-24x7 as a shared folder, so anyone who would want to share anything with other teams or on their team can use it as a shared folder..”

**Kelghazouli Rasuli**

Group IT Director at Premier Group

“Collaboration between team members, work lists and item lists, and data export are my main use cases for Sharepoint 2010 on Windows server 2012r2-24x7. There are some Sharepoint custom apps that have been created as well.

“Regarding collaboration in Sharepoint 2010 on Windows server 2012r2-24x7, messages are passed between team members through posts and replies to track progress on different work items. For the custom apps, one in particular was created for the MRI department where a custom list was established so users could request access. It is called badge request access, and there is a workflow for approval by senior staff.

“The main use cases in Sharepoint 2010 on Windows server 2012r2-24x7 have been primarily for custom apps for different access requests, particularly the previously mentioned badge access application and for requesting access to other resources. Different Sharepoint groups were controlled through Active Directory, and information for each separate team was controlled by access through Active Directory..”

# Customer Service and Support

“I personally did not have to reach out to customer support for Sharepoint 2010 on Windows server 2012r2-24x7, but I know some of my colleagues did. I am aware there were some frustrations, but overall, I think it was very satisfactory. They got good results and everything is working, so it turned out okay..”

**Cliff Osborne**

Application Developer at El Camino Hospital

## Other Advice

“My result with Sharepoint 2010 on Windows server 2012r2-24x7 has been pretty positive. I am not sure if anybody would be looking to jump to Sharepoint 2010 at this point if they are not already using it, especially since it is no longer supported since 2021. However, anyone coming into an environment that already had it implemented would find that it will go well, and I would encourage them to use it.

“Sharepoint 2010 on Windows server 2012r2-24x7 has been a very successful program for Microsoft. I first started using Sharepoint when it was the 2007 version and moved to 2010. I cannot say that I have any negative impressions of it. I recommend any company use it as they will benefit from it. I would rate this solution an 8 out of 10..”

**Cliff Osborne**

Application Developer at El Camino Hospital

[Read full review](#) 

“I estimate that moving to Sharepoint workflows saves around 30 percent of costs, especially in paper, printer, and ink consumption.

“I gave Sharepoint 2010 on Windows server 2012r2-24x7 an eight out of ten because there are some limitations in workflow cases where I have to write code instead of relying solely on the GUI.

“My advice to others looking into using Sharepoint 2010 on Windows server 2012r2-24x7 is that if they want to save money, save time, and automate their paperwork, this is one of the best workflow cycles or applications they can use for customizable workflow approval cycles. I rate this solution at eight out of ten..”

**Kelghazouli Rasuli**

Group IT Director at Premier Group

---

“I appreciate the user-friendly and intuitive interface of Sharepoint 2010 on Windows server 2012r2-24x7.

“My advice to others looking into using Sharepoint 2010 on Windows server 2012r2-24x7 is that it provides top-notch security for our documents. It can be integrated with almost all products and features available in the market, and they keep adding functionalities over time, which is a great relief for any business that may require collaboration with other products based on business needs.

“I have additional thoughts about Sharepoint 2010 on Windows server 2012r2-24x7 in that it is very easy to use and the interface has always been intuitive and user-friendly, thus making the learning curve very smooth. I gave this product a rating of 9 out of 10..”
