Product Recap

CodeSignal Interview

CodeSignal Interview Recap

We are a technology company aiming to make talent accessible by creating software and standards for assessing the technical skills of software developers.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

- ✓ “CodeSignal Interview is a great tool with a lot of competitors, but it offers a full suite for testing leetcode style and whiteboard systems design style questions.”

Peter Johnston

Human Resources Specialist at Goldman Sachs

- ✓ “CodeSignal Interview is the best platform that eliminates many levels and helps determine candidate testing ability.”

Elias Kimani

Senior Project Manager at Unilever

- ✓ “CodeSignal Interview has positively impacted my organization by undoubtedly increasing an applicant's problem-solving and reasoning abilities.”

Alice Rosenberg

Technical Lead at Unilever Inc.

- ✔ “Whether you are a candidate or the employer looking for a potential candidate, you can be sure that CodeSignal Interview will make the task as easy as possible for you.”

Sangha Khanna

Digital Marketing Manager at Unilever

- ✔ “I highly recommend this tool because CodeSignal can be useful to help determine the knowledge of engineers on more theoretical topics.”

Denip Robert

Developer at Nestlé

- ✔ “CodeSignal Interview is a game-changer solution.”

Patel Miraj

Senior Software Engineer at AT&T

- ✔ “CodeSignal Interview is a must-have tool, so it is best you get used to it now for any organization that is looking for a great interview experience for the technical team.”

Vifeko Alice

Account Executive at Roche

What users had to say about valuable features:

“The best features that CodeSignal Interview offers include edge cases evaluation, detailed problem description, interactive coding interface, and good questions. I also appreciate the user-friendly interface, a point system that pushes me to complete more problem solving, easy assessments, rarely repeated questions, and good rating after completing an assessment.

The interactive coding interface and the point system help me prepare for technical interviews.

CodeSignal Interview has positively impacted my organization as I can really practice answering questions from various companies, and I used it to prepare for interviews. It's positive in giving quality scores. .”

Robert Majiy

Data Analyst at AT&T

[Read full review](#) 

“Some of the best features that CodeSignal Interview offers include intensive technical interview preparation. The online evaluation option is an excellent approach to assess candidates. The simple user interface allows for simple operations.

“The user interface has been very user-friendly and intuitive. It has inspired me to spend more time on this application and has prompted me to discover new and more productive development techniques.

“CodeSignal Interview has positively impacted my organization by undoubtedly increasing an applicant's problem-solving and reasoning abilities. It contains a variety of interesting and difficult tasks that encourage creative thinking..”

Alice Rosenberg

Technical Lead at Unilever Inc.

[Read full review](#) 

“The best features CodeSignal Interview offers include providing challenging code problems to enhance problem-solving skills, helping track problem-solving performance, and connecting different developers. It has an easy-to-use and clean UI/UX. Preparing for the interview process and getting ready for famous company interviews is easy. Live coding tests and pair coding are great features. There are also multiple language options, ensuring that language is not a barrier.

“CodeSignal Interview has positively impacted my organization as it helped me learn this job. It was a very nice tool that I used to enhance my skills. It also provides a better way to hire since we, as HR, save a lot of time. It serves as a better way to learn and practice effectively. CodeSignal Interview has a positive return on investment on our objectives as it helps to source out the right talents to fit into a position with no need for vigorous orientation or retraining, hence saving a lot of time. Approximately 60% of our time is saved when we are recruiting the right hires..”

Peter Johnston

Human Resources Specialist at Goldman Sachs

[Read full review](#) 

“CodeSignal Interview is the way to go for hiring potential candidates, and it is very essential for us to recognize talent and hire smartly. After the initial step of resume scanning, it becomes imperative to know whether a potential employee is technically sound or not. CodeSignal Interview as a platform helps achieve that as it allows the user to choose a programming language they are comfortable with and simultaneously provides the user with a robust and easy to use UI to code and see the output.

“I love the easy question reading and coding interface in CodeSignal Interview, which is easy to navigate and customize.

“CodeSignal Interview provides a great user interface that is very intuitive and easy to use. There is easy question reading and coding interface, quick results, and hardly any delay or buffering. It offers a quantitative measure of each submission, an effective screening process, a responsive support team, a variety of well-organized questions, and high accuracy.

“I think all the features of CodeSignal Interview are very robust and helpful in my organization, especially the effective screening process where CodeSignal's efficient candidate evaluation processes are found valuable for assessing technical competence. The platform also offers a wide range of well-organized questions, which provide insights into a candidate's thought processes. Additionally, the intuitive user interface is very easy to navigate and the learning curve becomes very easy..”

Sangha Khanna

Digital Marketing Manager at Unilever

[Read full review](#) 

“The best features CodeSignal Interview offers include good quality questions for software engineering, a code editor, and a time ticker warning. It is one of the best platforms to give proctored tests, with a good color theme for the editor and plenty of programming language support.

The code editor in CodeSignal Interview works great when I want to edit a certain code to fit my needs. The time ticker is useful when an interview is about to begin and when I am almost done or when the time is almost done, the time ticker reminds me about that.

I would also add that CodeSignal Interview has a great user interface, multi-language support, and quality problem-solving questions.

CodeSignal Interview has positively impacted my organization by saving time and energy during the earlier stages of candidate evaluation. It optimizes resources and provides a detailed explanation of the premise. Additionally, it helps to provide very quick results. There are no additional software requirements for proctored tests, and a proper walkthrough before I start my test really helps me familiarize myself with the environment.

From using CodeSignal Interview, I have seen metrics showing a 40% time saving during the hiring of potential candidates. It helps to manage and streamline the hiring process for my company, hence saving a lot of time. Saving time and energy during the initial stages of candidate assessment helps to streamline the hiring process.

CodeSignal Interview has helped us save time and streamline our hiring processes. CodeSignal Interview is a game-changer solution..”

Patel Miraj

Senior Software Engineer at AT&T

[Read full review](#) 

“CodeSignal Interview is a very good tool to assess coding ability with data structures and algorithms of a potential employee, and I have noted that it gives an excellent review of the strength of the applicant. The wide range of questions in the system tests people on a variety of different skills that might be needed and expected out of the applicant.

“I love the Jupyter Notebook, collaborative editing, video demonstration, Python interactive API, interview preparation, and quality of technical assessments that CodeSignal Interview offers.

“The interactive coding task and point system are the features I find myself using the most because they push us to compete for more.

“CodeSignal Interview has a user-friendly interface and is a good resource for technical assessments. It also provides an effective screening process and high accuracy.

“CodeSignal Interview positively impacts my organization by giving a quality score, which is useful in interview preparation. A plus point is that you can take one assessment and apply it to multiple companies' roles.

“Since using CodeSignal Interview, there has been a positive impact on hiring speed, leading to measurable improvements in our processes..”

Elias Kimani

Senior Project Manager at Unilever

Other Solutions Considered

“I previously used HackerRank and TestGorilla. We switched from HackerRank to CodeSignal Interview. I have also used HackerRank to evaluate my coding knowledge. However, I think CodeSignal Interview has more challenging code and more suitable code to experience one's knowledge for a particular language or module. CodeSignal Interview helps to prepare for interview questions and already has the questions that are being asked in previous interviews..”

Alice Rosenberg

Technical Lead at Unilever Inc.

[Read full review](#) 

“I previously used Codility, and I switched to CodeSignal Interview because it is very easy to use and provides good tests, good scores, and is very cost-effective. Additionally, the support is very proactive. The platform also devotes a great amount of time and care to ensuring user satisfaction, leaving no stone unturned in the interview process, making it a great tool for preparing interviewees.

Before choosing CodeSignal Interview, I evaluated other options, including HackerRank and Plum.io..”

Patel Miraj

Senior Software Engineer at AT&T

[Read full review](#) 

“Previously, we were using a solution called HackerRank.

“We switched from HackerRank to CodeSignal Interview because CodeSignal Interview is better than HackerRank in mostly every other term. It is very cost-effective and easy to use for both employees and applicants. It provides good questions and prepares the applicant well, which makes the interview process very easy and seamless..”

Peter Johnston

Human Resources Specialist at Goldman Sachs

ROI

Real user quotes about their ROI:

“I have seen a return on investment in that there is a better interview experience for both interviewees and interviewers, great talent filtering, and less waste of time..”

Denip Robert

Developer at Nestlé

[Read full review](#) 

“I have seen a return on investment as I've saved time, especially because it is much faster to find the right candidates. It gives good results, especially with applicants, and I was able to select the best. Although I might not get insights into the real knowledge of the candidate in all cases, CodeSignal Interview allows me to get everything right..”

Robert Majiy

Data Analyst at AT&T

[Read full review](#) 

“We have seen a return on investment with specific examples. Earlier we used to take multiple interview rounds, and CodeSignal Interview saved one interview round per interview. Now we have started using assessments and code pairing exercises. This has saved the total number of hours per interview and has had a positive impact..”

Verified user

Vice President at a financial services firm with 10,001+ employees

[Read full review](#) 

“I have seen a return on investment, as CodeSignal Interview helps our employees improve their knowledge about code. It helps my organization to become more reliable with perfect code. Examining employees and applicants has been more simple and time-saving, especially because we don't have to deal with a lot of applicants. We only deal with the best applicants that have great scores..”

Alice Rosenberg

Technical Lead at Unilever Inc.

[Read full review](#) 

“I have seen a return on investment with CodeSignal Interview, as it has made it easy and convenient to have all the companies I'm interviewing for in one place where I can take one test and send it to all companies, hence saving much time. CodeSignal Interview helped me get better at solving technical interview questions, and it saved me time when entering the interviewing rounds with companies..”

Vifeko Alice

Account Executive at Roche

[Read full review](#) 

“I have seen a return on investment with CodeSignal Interview, as the platform offers high accuracy, reliable compiling speed, code syntax accuracy, multi-tenant coding capabilities, diverse question sets, and a good user design. It saves time, especially for the hiring process of the HR department. It has been advantageous in terms of saving time for interviewees due to its simpler approach. My coding abilities have greatly improved and continue to aid me in the interview process. The user interface has been really intuitive and easy to navigate, which makes it very easy to customize my coding skills..”

Patel Miraj

Senior Software Engineer at AT&T

[Read full review](#) 

Use Case

“CodeSignal Interview is my main use case, as I use it for coding assessments for several companies. CodeSignal Interview has all the practicing questions which has helped me in achieving my goals. Many companies have questions for interviews that are too easy to solve if we have practiced on CodeSignal Interview, making it one of the best platforms to prepare oneself for future opportunities.

“Preparing for interviews, I utilize the point system which pushes us to achieve more and more points in CodeSignal Interview for coding assessments in my role..”

Elias Kimani

Senior Project Manager at Unilever

[Read full review](#) 

“Whether you are a candidate or the employer looking for a potential candidate, you can be sure that CodeSignal Interview will make the task as easy as possible for you. With its friendly and intuitive UI and smooth interface, you will be able to navigate between the tests you have given to see your previous score as well. I personally used it for assessing my code skills. I have used CodeSignal Interview heavily to hone my coding skills and interview techniques. It actually simulates a real interview environment, which helps a lot in preparing oneself for the interview process.

“There is a variety of questions available on the platform to practice, and we can have rankings to see where one stands..”

Sangha Khanna

Digital Marketing Manager at Unilever

[Read full review](#) 

“My main use case for CodeSignal Interview is to give online assessments during my application to various companies. The product serves as a great way to assess candidates and their problem-solving skills. In addition to that, it also employs proctoring services during the time of the assessment. This helps to automate the first few levels of the candidate selection process, which eases the need for manpower during these stages. I believe it's a great assessment tool that helps any company understand more about the candidate using various question-answer formats and puzzles to solve.

A quick, specific example of how my team used CodeSignal Interview for an assessment is that it allows a candidate to showcase his or her problem-solving skills. This is used to understand more about the candidate while also quickening the company's hiring processes and saving time. It helps to speed up the process of the candidate assessment as well as elimination and thus focus more on the rounds ahead. It's a great way to understand more about the candidate and also how he or she approaches a problem..”

Patel Miraj

Senior Software Engineer at AT&T

[Read full review](#) 

“My main use case for CodeSignal Interview is that it's a very good learning tool for improving coding skills. In my organization, out of hundreds of people who apply to work at our company, CodeSignal Interview assists us in identifying the best candidates. CodeSignal Interview offers two types of examinations: General Coding Evaluation and Data Science Assessments. The candidates' scores are legitimate because they are proctored and confirmed. It saves time because we only have to interview a smaller number of individuals.

“I find that my main use case for CodeSignal Interview is very advantageous and acceptable for applicants who are not fluent in some languages, such as myself, because it offers multiple languages. Applicants benefit greatly from companies that hire applicants based on their logical and problem-solving abilities, and CodeSignal Interview gives them the ability to do so..”

Alice Rosenberg

Technical Lead at Unilever Inc.

[Read full review](#) 

“My main use case for CodeSignal Interview is that it's a very good tool to assess code ability with data structures and algorithms of a potential employee, giving an excellent review of the strength of the applicant. The wide range of questions in the system tests people on a variety of different skills that might be needed and expected out of a software developer.

A specific example of how I've used CodeSignal Interview in my hiring process was to assess coding ability with data structures and algorithms of a potential employee. It's well-suited to test the reasoning behind their approach or to find out if the person knows what they are typing and if they understand why it works the way it works. I have been using CodeSignal Interview for interview preparation for intern positions and full-time opportunities. I have extensively solved problems on data structures and algorithms that are quite essential to any interview or assessment of my organization. The problems on arrays, strings, linked lists, hash maps, and dedicated interview preparation material helped me a lot in cracking the interviews and thus aiding me in the process of achieving my dream jobs at my dream companies. .”

Robert Majiy

Data Analyst at AT&T

[Read full review](#) 

“My main use case for CodeSignal Interview is that it is an incredible recruiting source, helping sort out interview applicants by examining them on their skill set required for the job. While recruiting, some services require expertise and expert experiences as priority above word of mouth, cover letters, and CVs. That demonstration of one's capability when giving the task at hand is valuable. In instances of recruitment of such services, CodeSignal Interview provides an additional filter to sort out the best among candidates. It is also a good platform for advanced programmers as it introduces the format to a wider range of possibilities with code and a later platform to refresh and optimize skills for new interviews or projects.

“While the interviewee is able to access the technical skills of new developers that are being recruited, it is also used by developers to improve their problem-solving skills by solving coding problems on the platform. Additionally, we use CodeSignal Interview questions for our daily coding challenges and also weekly challenges. CodeSignal Interview is a nice platform that provides front-end challenges and also improves problem-solving skills for those who want to learn about front-end development..”

Peter Johnston

Human Resources Specialist at Goldman Sachs

[Read full review](#) 

Customer Service and Support

“The customer support of CodeSignal Interview is very proactive and responsive. They are quick to respond to any challenges I might have. For the few times that I have reached out to them, they were very proactive and responsive on time..”

Vifeko Alice

Account Executive at Roche

[Read full review](#) 

“CodeSignal Interview provides a great user interface that is very intuitive and easy to use. There is easy question reading and coding interface, quick results, and hardly any delay or buffering. It offers a quantitative measure of each submission, an effective screening process, a responsive support team, a variety of well-organized questions, and high accuracy..”

Sangha Khanna

Digital Marketing Manager at Unilever

Other Advice

“My advice for others looking into using CodeSignal Interview is that it is a great tool that I would highly recommend, especially for online assessments and learning about coding skills. It is very nice for running interviews and a great way to determine technical coding interview questions. The service for sharing the editor with the interviewee via video camera makes it easy to conduct interviews. CodeSignal Interview is a great tool with a lot of competitors, but it offers a full suite for testing leetcode style and whiteboard systems design style questions. I gave this product a rating of 9 out of 10..”

Peter Johnston

Human Resources Specialist at Goldman Sachs

[Read full review](#) 

“The advice I would give to others looking into using CodeSignal Interview is that it undoubtedly increases the interviewer and interviewee problem-solving and reasoning abilities, so it is a highly recommended tool. It is advantageous and acceptable for applicants who are not fluent in some languages. They can benefit greatly from companies that hire based on their logical and problem-solving abilities. As a result, both the business and the interviewee will benefit from it.

“I gave CodeSignal Interview a rating of 9 out of 10..”

Sangha Khanna

Digital Marketing Manager at Unilever

[Read full review](#) 

“I rate CodeSignal Interview a nine out of 10.

I choose a nine out of 10 because in conducting interviews, CodeSignal is best in class and offers a full suite of modern functional features to support developers and engineers of all experience levels. It allows quick editing and returns time to the interview by being dependable and efficient.

My advice for others looking into using CodeSignal Interview is that I highly recommend this tool because CodeSignal can be useful to help determine the knowledge of engineers on more theoretical topics. In my experience, CodeSignal can be very useful for more junior roles, especially when you receive a lot of applications and you need to gather more data points on candidates before deciding whether or not to move forward with more interviews..”

Denip Robert

Developer at Nestlé

[Read full review](#) 

“The online evaluation option in CodeSignal Interview helps us to prepare for problem-solving and logical abilities according to the interviews that we might be asked in any company that we apply for a job.

“I would recommend CodeSignal Interview to my colleagues, friends, or any company for a very important reason, which is its user-friendly coding learning technique for preparing candidates for an interview as well as for the market. CodeSignal Interview has many types of coding languages, allowing one to learn any language from this single website easily.

“I think it's very beneficial and appropriate for applicants such as myself who are unfamiliar with certain languages. I would rate this product a nine out of ten..”

Alice Rosenberg

Technical Lead at Unilever Inc.

[Read full review](#) 

“The advice I would give to others looking into using CodeSignal Interview is that it helps a lot in technical interview preparation, allowing you to actually prepare for questions asked by different companies on CodeSignal.

CodeSignal Interview is an excellent product, as it helps in giving knowledge to applicants on various questions asked by various companies, so they are able to prepare and gain vast knowledge of the questions. Most of the test problems are programming problems that are aimed to be solved in a short time with high accuracy.

The plan to prepare is very detailed, and the programming questions are on par with the industry standard, helping me gauge the difficulty level of the problems that I might face during the interviews. Sharing the existing score saves time, approximately 60 to 70 percent.

I gave this product a rating of 9 out of 10. .”

Robert Majiy

Data Analyst at AT&T

[Read full review](#) 

“I rate CodeSignal Interview a nine out of ten.

“I give it a nine out of ten because CodeSignal Interview has been a very efficient tool and the way to success. I have used it in several organizations that I have held for applications, and it has helped me prepare very well. Hence, I am able to get the position that I want. It has helped me prepare for technical interviews as I have provided several CodeSignal Interview exams and believe they are useful in predicting technical interviews.

“CodeSignal Interview expedites recruiting processes, saving time, and its ability is top-notch, making it very easy to use for both technical and non-technical users.

“I switched from [HackerRank](#) to CodeSignal Interview because CodeSignal Interview has a better and wider range of questions along with proctoring, and the interface enables ease at solving problems with the help of the editor and other amazing features.

“CodeSignal Interview's scalability is very high as it can be used by any size of organization.

“I rate the customer support an eight out of ten.

“I advise others looking into using CodeSignal Interview to consider it because it has a better and wider range of questions along with proctoring. It has a very intuitive and user-friendly interface that enables ease at solving problems with the help of the editor and other amazing features. The proctoring feature has eliminated cheating in the test and has helped to identify the best candidate based on merit.

“CodeSignal Interview is the best platform that eliminates many levels and helps determine candidate testing ability. My overall rating for this review is nine out of ten..”

Elias Kimani

Senior Project Manager at Unilever
