# Product Recap

Red Hat Learning Subscription

# Red Hat Learning Subscription Recap

Red Hat Learning Subscription provides enterprises with access to a wide range of high-quality training resources. Its offerings include hands-on labs, certification exam vouchers, and guided learning paths, all designed to foster career growth and expertise in Red Hat technologies.

Red Hat Learning Subscription focuses on delivering flexible and self-paced learning options, featuring a robust virtual lab environment that enhances practical skills. Users benefit from a comprehensive course catalog that supports role-based training and skill assessments. While the platform offers a wide range of materials, some suggest separating content by product to improve navigation. With a current emphasis on Red Hat Linux, Ansible, and JBoss, there is room for expanded course coverage. Subscription pricing and duration may be considerations for potential users, with some expressing challenges with the current 90-day access period.

## What are the key features of Red Hat Learning Subscription?

- **Comprehensive Course Catalog:** Extensive training resources across Red Hat technologies.
- **Hands-on Labs:** Unlimited lab access for practical skill development.
- **Certification Exam Vouchers:** Included to support professional certification.
- **Guided Learning Paths:** Structured paths for targeted skill enhancement.
- **Self-Paced and On-Demand Learning:** Flexible options to learn at one's own pace.

## What benefits should users consider when evaluating the platform?

- **Career Growth:** Role-based training enhances professional opportunities.
- **Flexibility:** Diverse learning methods cater to individual learning preferences.
- **Progress Tracking:** Users can monitor their learning journey effectively.
- **Practical Experience:** Virtual labs enhance hands-on skills.

In industries such as IT and business technology, Red Hat Learning Subscription is integral for employee training. Organizations appreciate its video classes, recorded sessions, and extensive study materials. The platform serves as a critical resource, especially for those expanding knowledge in areas like Kubernetes and business-related technologies.

# Valuable Features

Excerpts from real customer reviews on PeerSpot:

- ✓ “Red Hat Learning Subscription is worth its money, so it is a worth investment.”

**AbdulJaleel**

Senior Technical Lead at MORO

- ✓ “Red Hat Learning Subscription is very good as it allows you to do self-paced training, but there is also online training or on-demand training.”

**Verified user**

Linux Administrator at a insurance company with 1,001-5,000 employees

- ✓ “Red Hat Learning Subscription's hands-on lab environment enhances the learning experience by allowing people to gain more hands-on experience and practice.”

**Verified user**

Sr. Manager of UNIX and Storage at a tech services company with 5,001-10,000 employees

## What users had to say about valuable features:

“Ansible provides automation capabilities that deliver significant value. The solution saves time, which is one of the primary benefits.

“Red Hat Learning Subscription offers access to almost all courses, providing flexibility to users. Red Hat Learning Subscription's hands-on lab environment enhances the learning experience by allowing people to gain more hands-on experience and practice..”

“Red Hat Learning Subscription offers a list of courses with labs available. They provide 90 days and one-month subscription options. Accordingly, I can access video classes, recorded classrooms, materials, and lab setup for hands-on learning.

“The biggest advantage of Red Hat Learning Subscription is the lab facility and the materials are also good.

“I appreciate the hands-on lab environment with Red Hat lab environment in their cloud.

“In the learning portal, I can track how many courses I attended, what my progress is, and how many certificates I have taken.

“Red Hat Learning Subscription helps with my career development.

“This learning portal is very good for learning about Red Hat products. Whatever new things are coming, I can access this portal and learn, spend my time in practice and learning.

“Red Hat Learning Subscription has separate material for the labs and separate material for the entire course. There is guided instruction for the lab as well. If I want only the practice for the lab, I can go directly to the lab material and do not need to look at the entire documents about the course..”

**AbdulJaleel**

“I was dealing with the product for training subscriptions for approximately a month or so. Red Hat Learning Subscription is very good as it allows you to do self-paced training, but there is also online training or on-demand training. You have on-demand training and other types of training such as virtual classroom. They are all of a high standard and the quality of education is very good.

I have been using the hands-on lab environment when dealing with Red Hat Learning Subscription. The labs are good, and I did not experience any problems or things not working as expected. I did not really require any assistance to fix things to work further with it. It is of high quality and standard.

Role-based training in the sense of a whole stack of training to reach a certain point in relation to my assessment of this aspect can work well. If you don't have as much experience or exposure, in certain aspects it will probably work better if you are just more selective as to what you want. You can choose your own path.

I tracked my progress with the skill assessments online before doing the training for Red Hat Learning Subscription. I did some of those as well. It is more a general guidance type of thing. It gives a fairish view of where you are at.

I agree that it was useful for my career development, as it gives you a view of where your shortcomings are and then you can plan accordingly as to which courses you need to take.

Definitely, the learning paths helped me utilize Red Hat technologies more effectively. I wouldn't say you know everything and obviously one forgets, so you have to practice and there is some discipline you have to apply towards learning these technologies. The quality is good, so you learn the technologies and have the opportunity to learn the technologies very well, but you still have to put in the effort..”

# Other Solutions Considered

“I used SUSE one also. I cannot judge that one because I did not use SUSE much. I need time to look into that one also because I did not use that for long, only very small training or details. I cannot compare it. With Red Hat, I have spent a lot of time, but with SUSE, I did not spend time, so I cannot compare..”

# ROI

Real user quotes about their ROI:

“I have not observed some return on investment as yet, but it definitely broadens knowledge as to what works and what doesn't work and how to reach a certain point to get to a position where you can actually get a return on investment..”

**Verified user**

Linux Administrator at a insurance company with 1,001-5,000 employees

# Use Case

“Red Hat Learning Subscription provides video classes, recorded classrooms, materials, updated courses, and labs. The major advantage is the very good lab setup where I can do all hands-on practice.

“The hands-on lab helps with my learning experience and is unlimited. I can do the practice, and especially those looking for certification can do all kinds of practices in this environment. I can delete and recreate the labs myself, and those features are also available..”

**AbdulJaleel**

Senior Technical Lead at MORO

[Read full review](#) 

# Setup

The setup process involves configuring and preparing the product or service for use, which may include tasks such as installation, account creation, initial configuration, and troubleshooting any issues that may arise. Below you can find real user quotes about the setup process.

“I would rate the installation and ease of deployment from zero to 10 an eight, as I would say it is challenging, but that is the whole point. You need to challenge yourself with the installations on the labs. It is easy enough to follow along, but it is not too easy. You actually learn and actually grow..”

---

“Red Hat Learning Subscription is very simple to install and deploy. I do not need to install Red Hat Learning Subscription. I am directly accessing the Red Hat portal and connecting to the Red Hat cloud. I am registering through a browser and start using it. I am not installing it on my laptop, on my premise, or anywhere in another cloud. I am not installing it, not even in AWS..”

# Customer Service and Support

“I would rate technical support with Red Hat Learning Subscription as ten. There is an easily accessible chat option along with this training. In the same portal itself, if I face any issue, I can ask the agent and they will support it..”

**AbdulJaleel**

Senior Technical Lead at MORO

# Other Advice

“I am not really right now in relation with these products, but I have done some research, but not really anything substantial that I can provide. The only thing that you can probably look at is maybe that OpenShift can run on all cloud platforms as a cloud platform..”

**Verified user**

Linux Administrator at a insurance company with 1,001-5,000 employees

[Read full review](#) 

---

“I do not really work with JBoss. I do not really have any insights on the value of role-based learning paths within Red Hat Learning Subscription. I do not use any specific metrics to evaluate the effectiveness of the product. I am not clear about the question regarding metrics. I do not have anything to say about the negative side of Red Hat Learning Subscription. Red Hat Learning Subscription learning portal subscription is very simple. I would rate this review as ten..”

**AbdulJaleel**

Senior Technical Lead at MORO

“I am not the right person to assess the value of Ansible's pre-built roles or playbooks in automation efforts because I do not use it directly. My team uses it, and I am unable to provide detailed technical assessments at that level.

“My team does not utilize the agentless architecture.

“Red Hat Learning Subscription helps with career development for employees.

“Red Hat's support is rated at an eight at this moment. The overall review rating for this product is nine..”

# About PeerSpot

PeerSpot is the leading review site for cloud, AI, and business software. We created PeerSpot to provide a trusted platform to share information about software, applications, and services. Since 2012, over 22 million people have used PeerSpot to choose the right software for their business.

PeerSpot helps tech professionals by providing:

- A list of products recommended by real users
- In-depth reviews, including pros and cons
- Specific information to help you choose the best vendor for your needs

Use PeerSpot to:

- Read and post reviews of products
- Access over 30,000 buyer's guides and comparison reports
- Request or share information about functionality, quality, and pricing

Join PeerSpot to connect with peers to help you:

- Get immediate answers to questions
- Validate vendor claims
- Exchange tips for getting the best deals with vendor
