Product Recap

Securiti

Securiti Recap

Securiti is the pioneer of the Data Command Center, a centralized platform that enables the safe use of data and GenAI. It provides unified data intelligence, controls and orchestration across hybrid multicloud environments. Large global enterprises rely on Securiti's Data Command Center for data security, privacy, governance, and compliance.

Securiti has been recognized with numerous industry and analyst awards, including "Most Innovative Startup" by RSA, "Top 25 Machine Learning Startups" by Forbes, "Most Innovative AI Companies" by CB Insights, "Cool Vendor in Data Security" by Gartner, and "Privacy Management Wave Leader" by Forrester.

For more information, please visit Securiti.ai and follow us on LinkedIn and Twitter.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

“The automated way of identifying and classifying personal information is very beneficial.”

Azhagarasan Annadorai

Founder at Kaizentric Technologies Private Limited

“The drag-and-drop features make Securiti easy to use, even for individuals who are not tech-savvy.”

Atul-Gupta

Manager at Cognizant

“Data discovery is a fantastic product.”

Abhijit MAJUMDAR

Senior Manager at KPMG

“The process mapping is a good tool. We have a nice view of their data.”

Franck Edery

Data Scientist, Protection of Personal Information, Information Security at Eviden France

“Overall, I would rate Securiti a nine out of ten.”

Calvin Farmer

Integration Lean Non Financial Risk Transformation at a financial services firm with 10,001+ employees

“Technical support for Securiti is good.”

Verified user

Works

“The initial setup is easy.”

What users had to say about valuable features:

Depending on the point of view, if I am in a commercial role, I always emphasize compliance with the law, for example, in Panama 81. In Chile, we have a new law regarding data protection. From a technical standpoint, the Discovery process is very detailed. For example, you have details like the color of the eyes, religious data, and credit card information.

The consent management framework is notable for its ability to manage consent across multiple platforms, which is significant for privacy and open banking. The data lineage visualization is powerful for tracking data paths and interactions. The tool offers third-party risk management, business continuity compliance, and aligns with local regulations, which is beneficial for operational resilience.

Maintaining the privacy of customers and ensuring compliance with international regulations are critical features of Securiti. Nowadays, we are in an international environment, so the rules are not the same in the United States as in Europe. It is important to have an agreement with the customer to process the data.

Works

The drag-and-drop features make Securiti easy to use, even for individuals who are not tech-savvy. The ongoing improvements to the product are beneficial, and the automation capabilities are useful for automating data privacy tasks. These features help by allowing tasks to be performed without requiring a highly technical person.

Atul-Gupta

Manager at Cognizant

“The automated way of identifying and classifying personal information is very beneficial. Otherwise, I would have to manually go through the data and seek expert knowledge from data owners/ stewards.

This tool makes it easier to automatically scan and classify based on contents. A specific feature I find effective is the sensitive data intelligence (SDI) module, which is very useful for automating compliance processes..”

AzhagarasanAnnadorai

Founder at Kaizentric Technologies Private Limited

[Read full review](#) 

“Their data discovery is a fantastic product. It is AI-enabled for automatic tagging and classifiers. Once a proper data discovery is completed, it suggests tags to automated classifiers. I genuinely appreciate this feature, and they are competitive in pricing compared to other vendors.

Automated tagging helps in identifying sensitive information. I also find their dashboarding to be very good, including their cross-border transfer maps for data movement. I consider access control and monitoring to be particularly useful, with a module in their NFI domain called access controls and monitoring, which is informative and easier to use.

We also employ it for automated data discovery by connecting to source systems to identify and classify personal identifying information (PIIA) across various assets. Code dot ai handles unstructured data sources, identifying sensitive information in OneDrive and ensuring it is secured from a compliance standpoint..”

Abhijit MAJUMDAR

Senior Manager at KPMG

[Read full review](#) 

Other Solutions Considered

“It's a good product. Everyone should at least try Securiti once before making a conscious decision as every organization, environment, and program comes with different objectives. A particular tool choice depends on a small POC, but I definitely recommend Securiti..”

Abhijit MAJUMDAR

Senior Manager at KPMG

“I have used Purview, however it is not really similar. I wouldn't recommend it to our customers. It's difficult to manage the cost. We looked at Didomi and Purview, however, the most efficient is security..”

Franck Edery

Data Scientist, Protection of Personal Information, Information Security at
Eviden France

Use Case

I have experience in the module of cookies. It provides us with tools and control of compliance for providers. I work with the product primarily in the banking sector or central banking.

Verified user

Services and Comercial Manager at a tech vendor with 11-50 employees

[Read full review](#) 

I manage Securiti for other people. Security is quite important today. My customers use it for data privacy and compliance. Nowadays, it is imperative to be compliant with the regulations. It depends on the country and the kind of data.

“The primary use case of Securiti is to scan and classify PII data in our datasets automatically. It helps me identify and classify personal information without manual intervention..”

AzhagarasanAnnadorai

Founder at Kaizentric Technologies Private Limited

[Read full review](#) 

Our customers mainly use Securiti for consent management and a bit of CCPA compliance. We had some integration with Salesforce and were attempting to make it a single source for the consent module.

Atul-Gupta

Manager at Cognizant

[Read full review](#) 

“I haven't been using the solution much. I work for a service company, and we resell some products. Security is one of the products that we resell. I have some certification in security, and I know what it does and its functionalities. However, we are a new reseller of security..”

Franck Edery

Data Scientist, Protection of Personal Information, Information Security at Eviden France

We have been evaluating Securiti in the context of Australian regulations such as the Australian Privacy Act and GDPR. The goal is to understand its potential for GDPR use cases, user rights, data lineage, and open banking, which relates to Australia's consumer data right. Our work involves evaluating Securiti's benefits for regulatory compliance related to privacy and open banking.

Setup

The setup process involves configuring and preparing the product or service for use, which may include tasks such as installation, account creation, initial configuration, and troubleshooting any issues that may arise. Below you can find real user quotes about the setup process.

The initial setup is easy. However, during the first part when I need to configure all the points for the scan, it can be somewhat complex. After that, the use is very simple and faster.

Verified user[Read full review](#) 

Services and Comercial Manager at a tech vendor with 11-50 employees

The initial setup was quite difficult. I work with data and am aware of all the policies. I have implemented many policies, like allowing people access to data and having some users with privilege, but it is more difficult.

Verified user[Read full review](#) 

Works

The initial setup was rated seven out of ten. The documentation needs to be more detailed, and the evolving product leads to a learning curve. Once familiar, it becomes easier, but improving documentation would help.

Atul-Gupta

Manager at Cognizant

[Read full review](#) 

“They have a very strong product support team. Even though we face some challenges, they are always there to help us. The training modules on their website are really user-friendly and helpful..”

Abhijit MAJUMDAR

Senior Manager at KPMG

[Read full review](#) 

“The initial setup faced challenges, and it was not straightforward. Many proof of concepts were conducted to ensure reliable output. I encountered several issues requiring technical support..”

AzhagarasanAnnadorai

Founder at Kaizentric Technologies Private Limited

[Read full review](#) 

Customer Service and Support

The customer service and support from Securiti have been noted for their helpfulness and responsiveness. The team in Asia-Pacific has been particularly supportive and generous with partners, providing comprehensive assistance and material.

Calvin Farmer

Integration Lean Non Financial Risk Transformation at a financial services firm with 10,001+ employees

[Read full review](#) 

“Technical support can be a hit or miss. Some technical staff are great, but others are not very effective. On average, I would rate the technical support 4/10..”

AzhagarasanAnnadorai

Founder at Kaizentric Technologies Private Limited

[Read full review](#) 

The technical support from Securiti involves a local 'level one' support which is quite basic. I need to ensure that the infrastructure and communication network are in place. If not, I can escalate issues to Securiti.

Verified user

[Read full review](#) 

Other Advice

The software requires an understanding of the regulatory environment and is not a silver bullet solution. It's essential to know about local privacy laws and organizational security policies while using the software. Overall, I would rate Securiti a nine out of ten.

Calvin Farmer

Integration Lean Non Financial Risk Transformation at a financial services firm with 10,001+ employees

[Read full review](#) 

My overall rating for Securiti is eight. Automating more support systems such as calls with the product team would enhance customer satisfaction. The support should be tailored to various client requirements.

Atul-Gupta

Manager at Cognizant

[Read full review](#) 

I would recommend Securiti because it provides many details regarding the information after scanning. The solutions are modular, so if a customer's budget is low, we can start with just one module. However, the initial configuration is not very easy for the customer and requires help from the provider. I rate the overall solution a seven out of ten.

Verified user

Services and Comercial Manager at a tech vendor with 11-50 employees

[Read full review](#) 

“I would recommend Securiti to others with challenges like obtaining human resources for timely classification. However, if manual classification works for other companies, it's the best option. I rate Securiti as 8/10..”

AzhagarasanAnnadorai

Founder at Kaizentric Technologies Private Limited

[Read full review](#) 

“I would put nine out of ten.

It's a very complete tool. It's easy to make data governance with it, as it relates to data security. However, the documentation can be difficult to read. .”

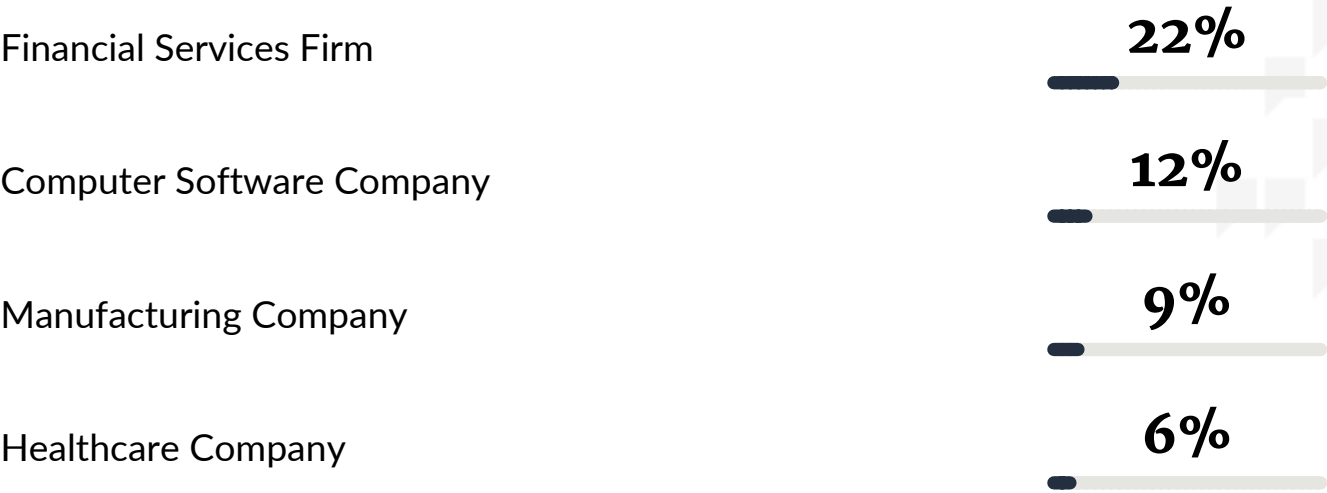

Franck Edery

Data Scientist, Protection of Personal Information, Information Security at Eviden France

About PeerSpot

PeerSpot is the leading review site for software running on AWS and other platforms. We created PeerSpot to provide a trusted platform to share information about software, applications, and services. Since 2012, over 22 million people have used PeerSpot to choose the right software for their business.

PeerSpot helps tech professionals by providing:

- A list of products recommended by real users
- In-depth reviews, including pros and cons
- Specific information to help you choose the best vendor for your needs

Use PeerSpot to:

- Read and post reviews of products
- Access over 30,000 buyer's guides and comparison reports
- Request or share information about functionality, quality, and pricing

Join PeerSpot to connect with peers to help you:

- Get immediate answers to questions
- Validate vendor claims
- Exchange tips for getting the best deals with vendor
