Udemy Business

Udemy Business Recap

We'll partner with you to develop and implement a long-term learning strategy that's aligned with your training and business priorities.

Access enterprise-ready features that make it easy to scale learning to all employees across your organization.

Features like learning paths and the ability to upload your own content let you engage your employees with customized learning experiences and monitor their progress.

Valuable Features

Excerpts from real customer reviews on PeerSpot:

✔ "The most valuable aspect is the hands-on experience it provides with labs, allowing real-world application and understanding of concepts beyond just theoretical knowledge."

ChimeremezeNwabueze

Azure cloud support engineer at Tek Experts

✔ "The main advantage of Udemy Business is its region-based learning. For example, if a learner from India wants to learn technology, they can find instructors from India who understand their learning style and thought process. This makes learning easier and more relatable. Additionally, Udemy Business is a global platform, so learners can access courses from instructors worldwide. A person from the USA or someone with a higher skill set can create videos. Another advantage is the range of available courses, with no limitations on what you can learn. You can get the right content for the specific technology."

Divya Prakash

Technical Architect at Hexaware Technologies Limited
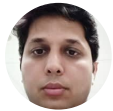

✔ "The solution enables us to train our users."

Eric Ha
Solutions Development Manager at Kyocera International

✔ "A great platform to start the learning curve for certain categories or topics"

Praveen Chaudhary
Service Delivery Manager at a outsourcing company with 1,001-5,000 employees

✔ "The tool's most valuable feature is its cloud computing content. While Udemy Business offers training and knowledge across various areas, I use it for cloud computing technologies. Many videos and tutorials are available on this topic, which benefits me."

GurpreetSingh4
Manager at Accenture company

✔ "The solution allows us to look at training at any time at our convenience. It has a mobile app, which we can easily access to take notes."

Manjunath Bhimareddy
Project Lead Performance Engineer & Automation at Allstate

✔ "The Udemy Business platform has a list of courses and a dashboard."

Teodor Muraru
Developer at Emag

What users had to say about valuable features:

"Udemy provides the opportunity for hands-on experiences. There are labs available for users to run so that they can experience the real thing, not just the theory. This allows them to encounter real-life situations and learn how to handle them effectively.."

ChimeremezeNwabueze   Read full review ↗
Azure cloud support engineer at Tek Experts

"The solution enables us to train our users. It helps them be aware of cyber attacks. The solution shows steps to understand how it happens. We do not have to worry about any cyber attacks. We can concentrate on our work. The UI is fine.."

Eric Ha   Read full review ↗
Solutions Development Manager at Kyocera International

"Udemy Business is a great platform to start the learning curve for certain categories or topics. By offering short-duration courses, Udemy Business doesn't demand any long-term commitments. The courses are highly affordable, and I have never paid more than twenty dollars, so I don't face any big losses even if a course fails to deliver value. ."

Praveen Chaudhary
Service Delivery Manager at a outsourcing company with 1,001-5,000 employees

"The tool's most valuable feature is the self-paced approach. It also has practice questions, which help with some of my work. The participation features are very useful as well.

Udemy Business' UI features are fine. Its administration is easy. You can add and remove groups. It helps to monitor usage. ."

Nureni Jimoh
ServiceNow ITSM/ITOM/SAM/CMDB Technical and Implementation Consultant at Doublelight Technology Limited

"What attracted us most to Udemy Business was the content. The amount of content on the platform covers all our requirements. Secondly, I would mention the structure of the e-learning platform. Those are the most important things to me. It is also easy to use.

I am happy with the tool's current features. The quality of the courses you choose depends on them, but in my experience, the courses we've selected have been excellent. I'd rate them nine out of ten in terms of quality.

The courses have made a difference. We are acquiring the skills and techniques that we need.."

Danie Joubert
Managing Director at ProQuanta

"The tool's most valuable feature is its cloud computing content. While Udemy Business offers training and knowledge across various areas, I use it for cloud computing technologies. Many videos and tutorials are available on this topic, which benefits me.

It provides assessments after courses and links to additional resources for areas where improvement is needed. I appreciate that once you purchase a course, it remains available forever, allowing you to revisit it whenever you have free time.

The GUI is nice, with videos and content on the right side and comments at the bottom. I haven't encountered any challenges with the user interface. The course quality is also good, and the platform is easy to navigate.

The benefit of using Udemy Business is that you can learn about new technologies. Sometimes, vendor-specific documentation can be lengthy and challenging to understand. Udemy Business courses condense this information into two- to three-hour sessions focusing on the most important topics and key points. This approach helps you remember and enhance your knowledge.."

Other Solutions Considered

"In my current organization, users mainly use Code Cloud, LinkedIn Learning, and Microsoft's learning platform due to our focus on Azure. Prior to joining my current workplace, I used Udemy since it was less expensive and provided a variety of courses.."

ChimeremezeNwabueze   Read full review ↗
Azure cloud support engineer at Tek Experts

"I've used multiple learning portals before. What I appreciate about Udemy Business is that there are no monthly charges. You can even try a trial class before deciding to purchase the full course.."

GurpreetSingh4   Read full review ↗
Manager at Accenture company

"In another competitor, a Microsoft partner platform called Pluralsight, I had a terrible experience with a yearly subscription of $300 to $400. The major tech courses were outdated, except for a few relevant tutorials. Udemy Business offers greater transparency than Pluralsight. For instance, if you are looking for a course on Azure Apps, Udemy Business will provide details about the course learnings prior to purchase, but on Pluralsight, they would just overpromise and wouldn't be able to deliver any latest tech tutorials. ."

ROI

Real user quotes about their ROI:

"By investing in developing existing employees, we create a smarter workforce. This is better than hiring new employees since you can make a loyal workforce. You may have to pay them more, but they can do more. ."

ShaheenKapery
Solutions Architect at Altron

Use Case

"I use the tool to develop technical skills. My company, which focuses on IT solutions consulting and support, uses training to stay updated on new technologies.."

Chalermsub Sangkavichitr   Read full review ↗
Senior Data Scientist at PTT Digital Solutions Company Limited

"Udemy is one of the key learning platforms. I get access to it from my office. I can learn anything I want. I have done Kubernetes and Azure certifications using the solution.."

MohanrajV   Read full review ↗
Tools manager at Harmony international

"When exploring a new learning area, we use courses from Udemy Business. We attend the courses, analyze the data, and then try to apply what we have learned to our work. It's straightforward.."

Dimitris Iracleous   Read full review ↗
Lead Technical Instructor at Code.Hub

"I have been using Udemy to take courses, particularly one focused on Google's programming language. Although I have not completed the course due to time constraints, I find the platform excellent for self-paced learning without the need for an instructor to be present one-on-one.."

ChimeremezeNwabueze   Read full review ↗
Azure cloud support engineer at Tek Experts

"The tool's main purpose is to enhance learning and responsiveness across the organization. We focus on making technology learning more convenient for employees. It provides resources for learning platforms like Oracle, AWS, and Microsoft Azure. Our goal is to promote learning from anywhere.."

Divya Prakash   Read full review ↗
Technical Architect at Hexaware Technologies Limited

"I primarily use the solution for IT training across numerous categories. For instance, if I am working on certain projects where additional knowledge or skills are needed, I will use Udemy Business to join a suitable course to gain basic knowledge. I am only able to gain in-depth knowledge through hands-on experience because, just like courses on Udemy Business, I haven't come across tutorials even on other platforms that are capable of providing in-depth and practical knowledge on certain topics or skills. For instance, if a DevOps project arrives on which I will work, I use Udemy Business to brush up on my knowledge. ."

Setup

The setup process involves configuring and preparing the product or service for use, which may include tasks such as installation, account creation, initial configuration, and troubleshooting any issues that may arise. Below you can find real user quotes about the setup process.

"The setup is generally straightforward. It's a platform where you can watch videos, and if you encounter any issues, you can directly contact the content creator. It is user-friendly. Some courses may offer better communication options than others.."

Dimitris Iracleous
Lead Technical Instructor at Code.Hub

"The web version of Udemy Business can be easily setup on smartphones. The mobile app from Udemy Business is quite straightforward and can be installed within five or ten minutes. Almost anyone can install the solution on their own, and not much maintenance is required; just some updates need to be installed from time to time. ."

Praveen Chaudhary
Service Delivery Manager at a outsourcing company with 1,001-5,000 employees

Read full review ↗

"The tool's deployment is easy. It can integrated into our platform using APIs. Learning access took just a few minutes, and the implementation was completed within hours. However, the key factor is not the deployment time but how the learning portal is integrated with the organization's existing infrastructure. Integrating with Udemy Business' API is not particularly challenging; the focus lies on maintaining the organizational learning portal.

The number of people needed for deployment and maintenance depends on the project's scale and goals. Typically, a team of engineers is required to handle the deployment and ongoing maintenance of the learning portal.."

Other Advice

"I rate the overall product a nine out of ten. For anyone considering using Udemy Business, I'd advise paying attention to the price point, as it's very competitive. In my opinion, it is one of the best platforms available in the market.."

Danie Joubert
Managing Director at ProQuanta

"For those passionate about computing, networking, or programming, Udemy is one of the best platforms to choose. It offers affordable courses that you can take at your own pace. I did not have any issues using Udemy.

I would rate Udemy Business ten out of ten.."

ChimeremezeNwabueze
Azure cloud support engineer at Tek Experts

"I would recommend Udemy Business because it's a perfect platform. However, it does have some shortcomings. Addressing those issues would improve the platform. Overall, it's a solid choice.

Overall, I rate the solution an eight out of ten.."

Verified user
Senior Architect at a engineering company with 10,001+ employees

Read full review [↗]

"I believe Udemy Business is already utilizing the basic AI capabilities by analyzing user search queries and user behavior on the platform and suggesting similar course options. I would overall rate the product a seven out of ten. I am still expecting courses on the latest or cutting-edge technologies like AI automation from the platform. I would advise the users of Udemy Business to be consistent with the platform and spend at least half an hour or a couple of hours on the availed courses. I would also advise others to check for discounts before purchasing on Udemy Business. ."

Praveen Chaudhary
Service Delivery Manager at a outsourcing company with 1,001-5,000 employees

Read full review [↗]

"It's a great learning tool with many videos covering the latest technologies. They often offer good discounts, making it affordable for students. However, the content sometimes remains basic and may not reach expert levels. Still, considering the price point, it's suitable for starting to learn a new technology.

It's a great platform for anyone starting to explore the latest technology. You can choose courses and receive feedback. Plus, discounts are often available, sometimes up to 90 percent off, making it affordable for youngsters.

I rate the overall product a nine out of ten.."

GurpreetSingh4
Manager at Accenture company

Read full review ↗

"The number of topics and courses being covered is good. The training materials are flexible, and they are regularly updated based on changes in that specific topic.

our course is good enough to complete the to take our own certification examined.

Everything fits the same. Udemy has a better list of the wide topics that are being covered.

We can upskill ourselves to keep in line with the industry's trends.
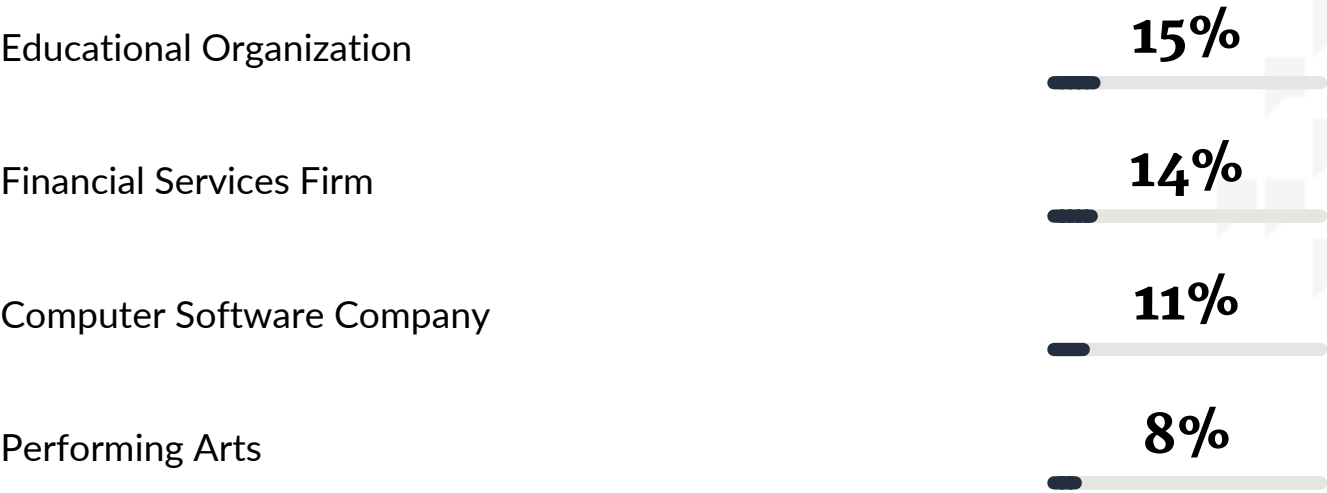

I rate the solution a nine out of ten.."

About PeerSpot

PeerSpot is the leading review site for software running on AWS and other platforms. We created PeerSpot to provide a trusted platform to share information about software, applications, and services. Since 2012, over 22 million people have used PeerSpot to choose the right software for their business.

PeerSpot helps tech professionals by providing:

- A list of products recommended by real users
- In-depth reviews, including pros and cons
- Specific information to help you choose the best vendor for your needs

Use PeerSpot to:

- Read and post reviews of products
- Access over 30,000 buyer's guides and comparison reports
- Request or share information about functionality, quality, and pricing

Join PeerSpot to connect with peers to help you:

- Get immediate answers to questions
- Validate vendor claims
- Exchange tips for getting the best deals with vendor
